Solution brochure

TESA Hotel

State-of-the-art digital access for hotels and holiday rentals

Experience a safer
and more open world

Your challenge: keep guests coming back - again and again

Guests want to fully relax in their accommodation. Hotel staff need to work smart. Property owners and managers target improved financial performance.

Digital access can be the answer. We help you digitalize and future-proof your hospitality business, supporting your move from the mechanical to the digital world.

Security

- Forget the security worries or replacement hassles from unreturned keys
- Every access event is monitored and logged for greater guest safety

Convenience

- Check-in with smartcard, mobile app or PIN, and breeze through contactless check-out
- Intelligent software simplifies and speeds-up security management, even from off-site

Cost efficiency

- Digital processes result in savings in personnel time and operational costs
- Energy-saving devices and easy door monitoring help to reduce energy expenditure

Digitalization makes access part of a memorable experience

TESA Hotel provides accommodation businesses with the convenience and efficiency of a secure, digital way to manage access for guests - and for everyone who works in the hotel.

A range of stylish, innovative digital devices blend with almost any interior, enhancing the appeal of your premises.

With TESA Hotel, from the access experts at ASSA ABLOY, you digitalize your business with confidence.

How your hotel or holiday rental benefits from TESA Hotel

More flexibility and security for premises

- Any sensitive opening, from doors to elevators, may be fitted with a digital access device
- Amending user access or cancelling access for a lost credential takes a couple of clicks
- Software makes it simple to trace user access or investigate incidents, if necessary
- This future-proof solution can be extended as needs evolve, protecting your initial investment

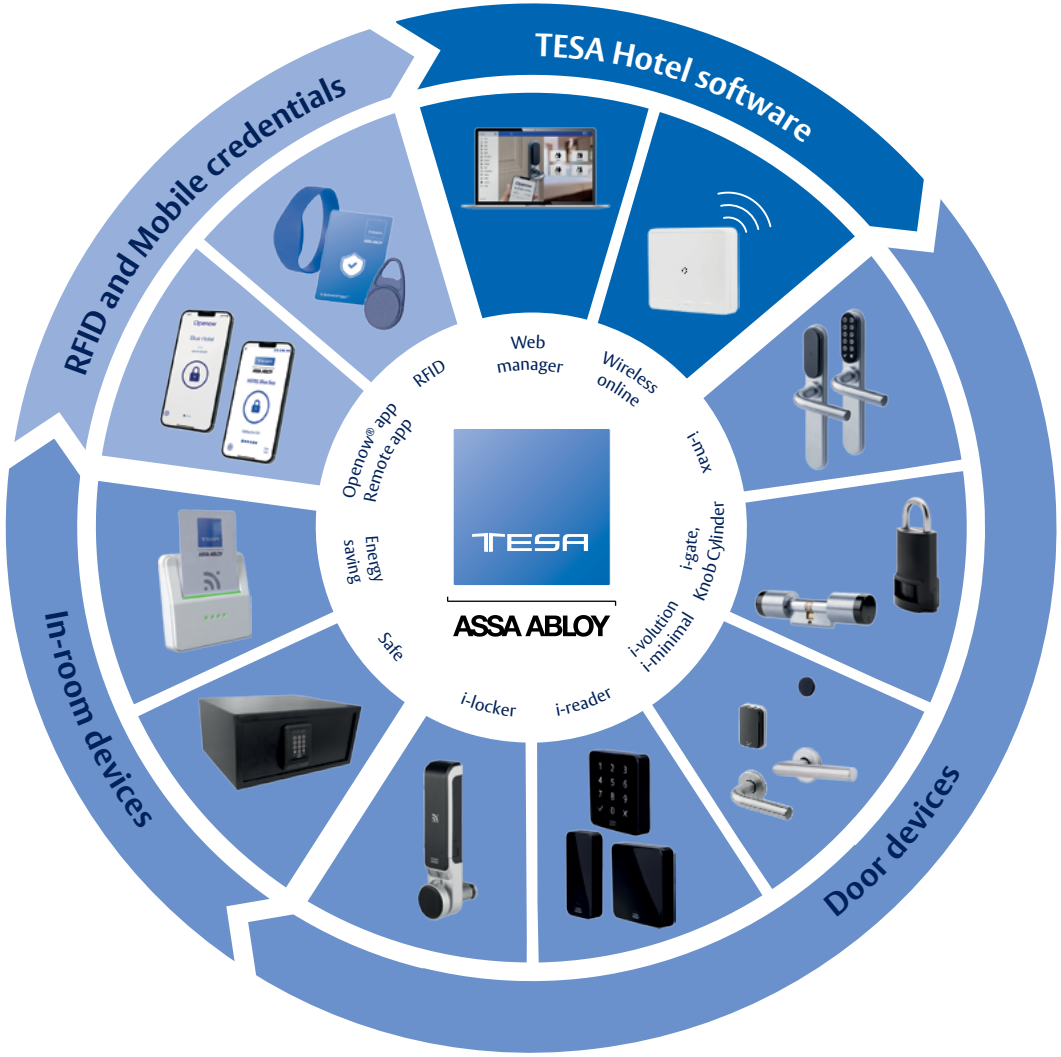
Smarter working for all your hotel staff

- Access management is done in the software, instead of manually, which cuts the hours spent managing keys
- A TESA Hotel system is easy to operate, even remotely, so there's no need for time-consuming staff training
- Check-in is quicker and slicker, freeing up employees' time, and check-out can be contactless

Concrete ROIs: money saved, happier guests

- Devices are powered by standard batteries, so there is no need for construction work or even to change the doors
- Credentials are cancelled with a click, saving money spent replacing locks or lost keys
- Energy-saving devices help to reduce waste and costs
- Smartphone keys and check-in by PIN enable guests to arrive queue-free when it suits them

The 3 elements of your TESA Hotel system



Software

Simplify guest management with a user-friendly interface which puts hotel staff in complete control

More on page 6

Devices

Battery-powered locks, wall readers and electronic cylinders - as well as a safe and energy-saving wall device - come in a range of finishes to match hotel interiors

More on page 11

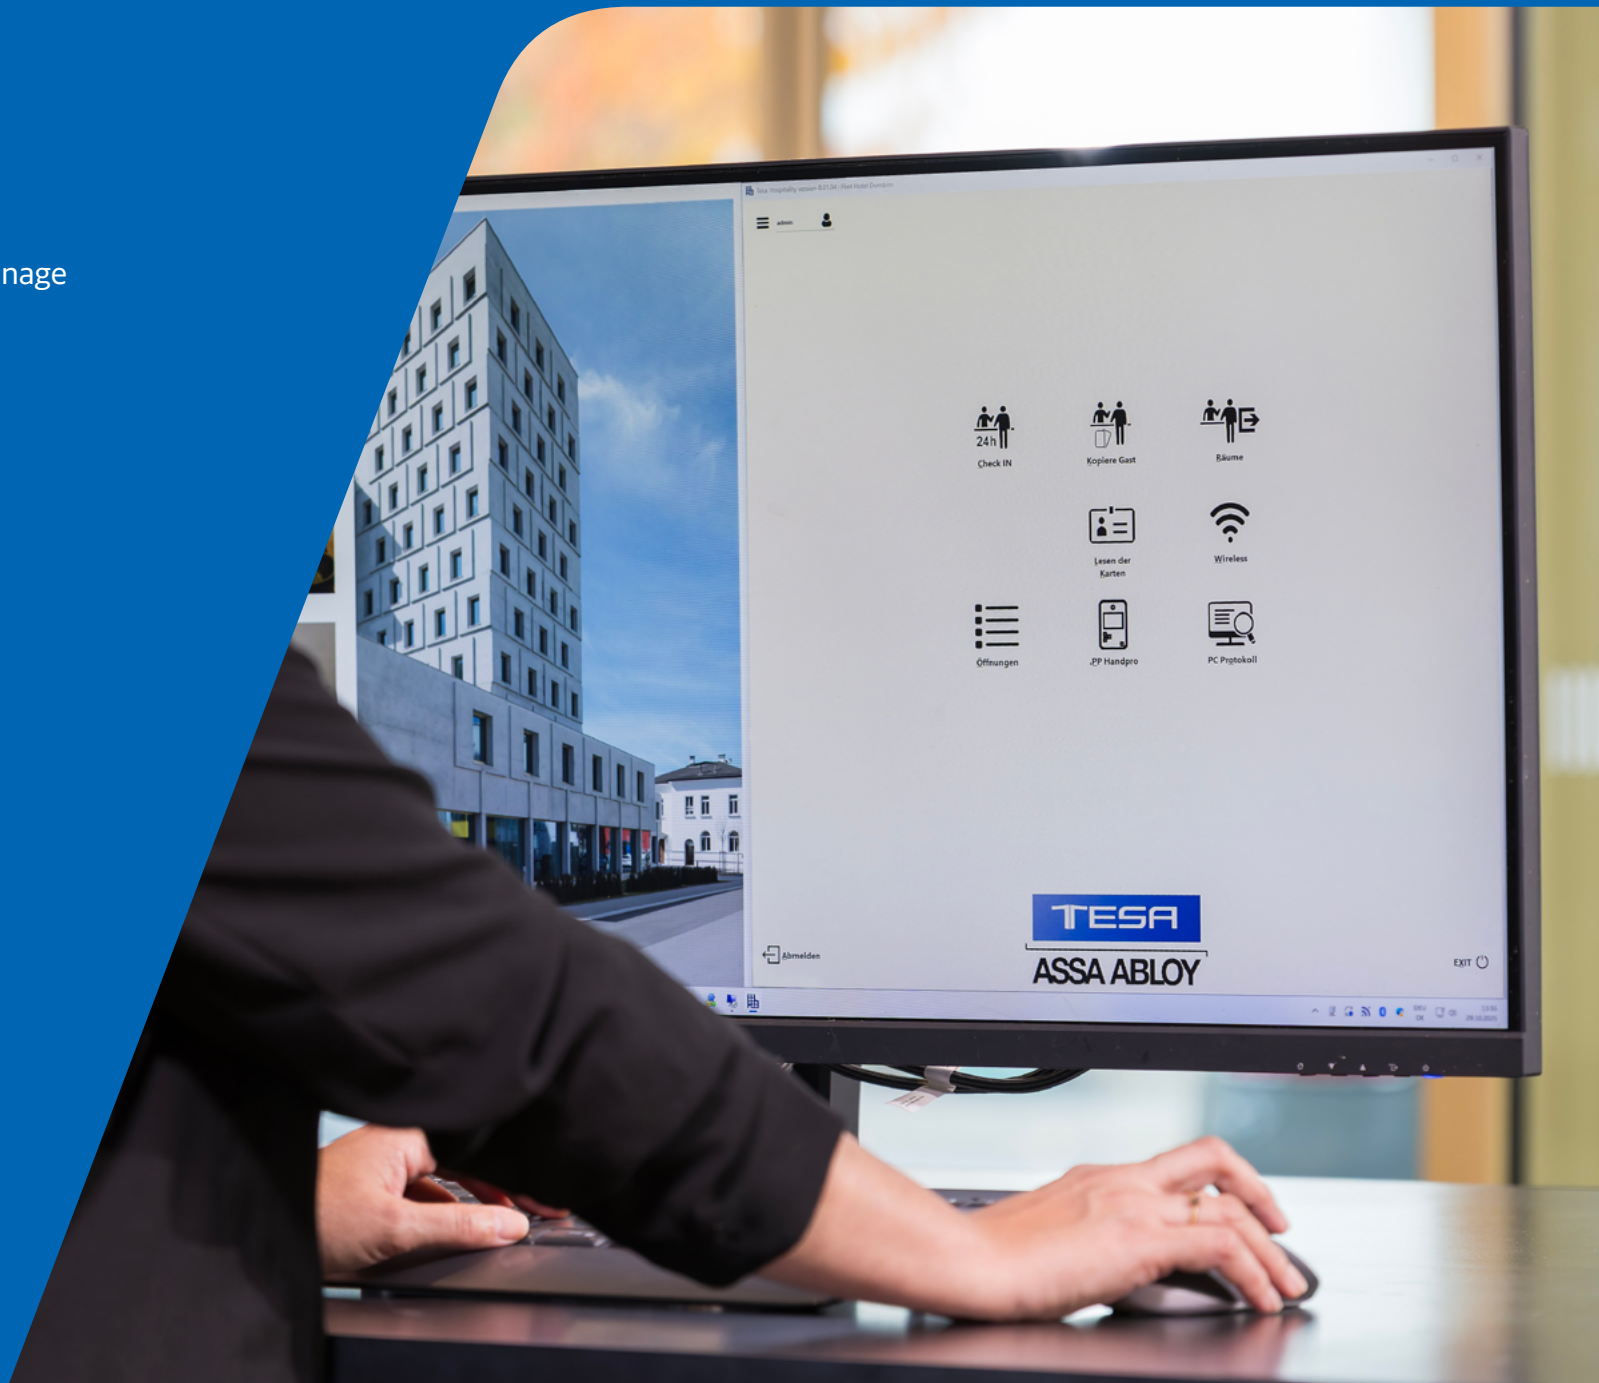
Credentials

Access rooms or common areas with a choice of smartcard, mobile app or PIN code

More on page 9

TESA Hotel software

An intuitive, user-friendly interface to manage all your guest rooms and shared spaces



Efficient and seamless for guests and hotel staff

Easy check-in and check-out

Simple and intuitive for reception desk staff, and from any device. Easy to integrate with PMS software and self-check-in kiosks. Guest access credentials are programmed with the appropriate number of nights and set to expire automatically

24/7 contactless arrivals on demand

Check-in by PIN gives guests time flexibility and removes need for a staffed desk. Smartphone keys in the Openow app create an appealing mobile experience. Managers are notified when guests arrive and can change stay dates in the software

Controlling and monitoring defined areas

Managers program credentials - card, phone or PIN - for time-specific access to areas or services, e.g. the gym. For added security, audit trails provide visibility of who went where, and when. Staff and contractors use the same access system

Manage with Update on Card & Openow®

Put guest and staff credentials to work for you, via cards or convenient smartphone keys

- Communication between doors and system via user cards or mobile keys
- Interaction with door automatically updates access rights and collects events
- Give guests the option to unlock rooms and common areas with their phone
- Email alerts warn you about low battery, denied access or out-of-time-zone

With Update on Card you can easily upgrade to Wireless Online if your security needs change

Manage with Wireless Online

Hotel access management in real time for security at busy properties with many guests

- Always know who enters where and when - guests and hotel staff
- Create, amend, or cancel anyone's access permissions at any time
- Set up email alerts to keep you informed about guest arrivals and more

The hub

- Communication between door devices and the software is automated and encrypted by hubs
- Each hub manages up to 60 doors within a 30-metre range
- In case of communication failure, functionality is maintained offline with the latest information stored

Scalable and upgradable

Adapt an existing installation to your growing needs, protecting the initial investment

Guest credentials

Smartcards, smartphone, or PIN?
You decide

Keyless hotel management

TESA Hotel provides the flexibility to manage guest and employee access the way you choose. Your guests experience the convenience of digital access to their rooms and designated common areas by smartcard, mobile app, or PIN code.

Card

Compatible with multiple secure RFID technologies and may be used for multiple services and devices including an in-room safe and energy-saving device.

PIN

Flexible round-the-clock check-in to rooms or rentals without a 24-hour reception desk. Guests enjoy total freedom and the comfort of a contactless arrival.

Openow® app

Guests unlock rooms and more from their phone, with no need to queue at reception to collect a key. Openow app is available for iOS and Android devices.

Remote app

Hotel staff unlock doors from anywhere with remote control from their smartphone, putting managers in control of entry without being on-site.

Digital devices

Durable and easy-to-install locks
for rooms and more

i-max electronic lock

Intelligent by design

Tough and elegant, the i-max blends with any interior, no matter the style or type. Available in multiple finishes and handles, it is designed for openings such as guestrooms, where robust security combines with frequent use.

i-volution electronic lock

Robust locking for maximum security

A sleek design makes this the perfect door lock for sophisticated spaces. The i-volution offers the benefits of our i-max but with its secure elements housed inside the door.

Includes sensors which register the following events:

- Door left open
- Door closed incorrectly
- Intrusion
- Mechanical cylinder use

i-locker cabinet lock

Hassle-free digital security for lockers & cabinets

i-locker is the smart, wire-free way to secure lockers, cabinets, drawers and more. Designed to eliminate the hassle of key or coin-operated systems, i-locker combines intuitive digital access with instant visual status indicators and robust engineering for total peace of mind.

i-locker

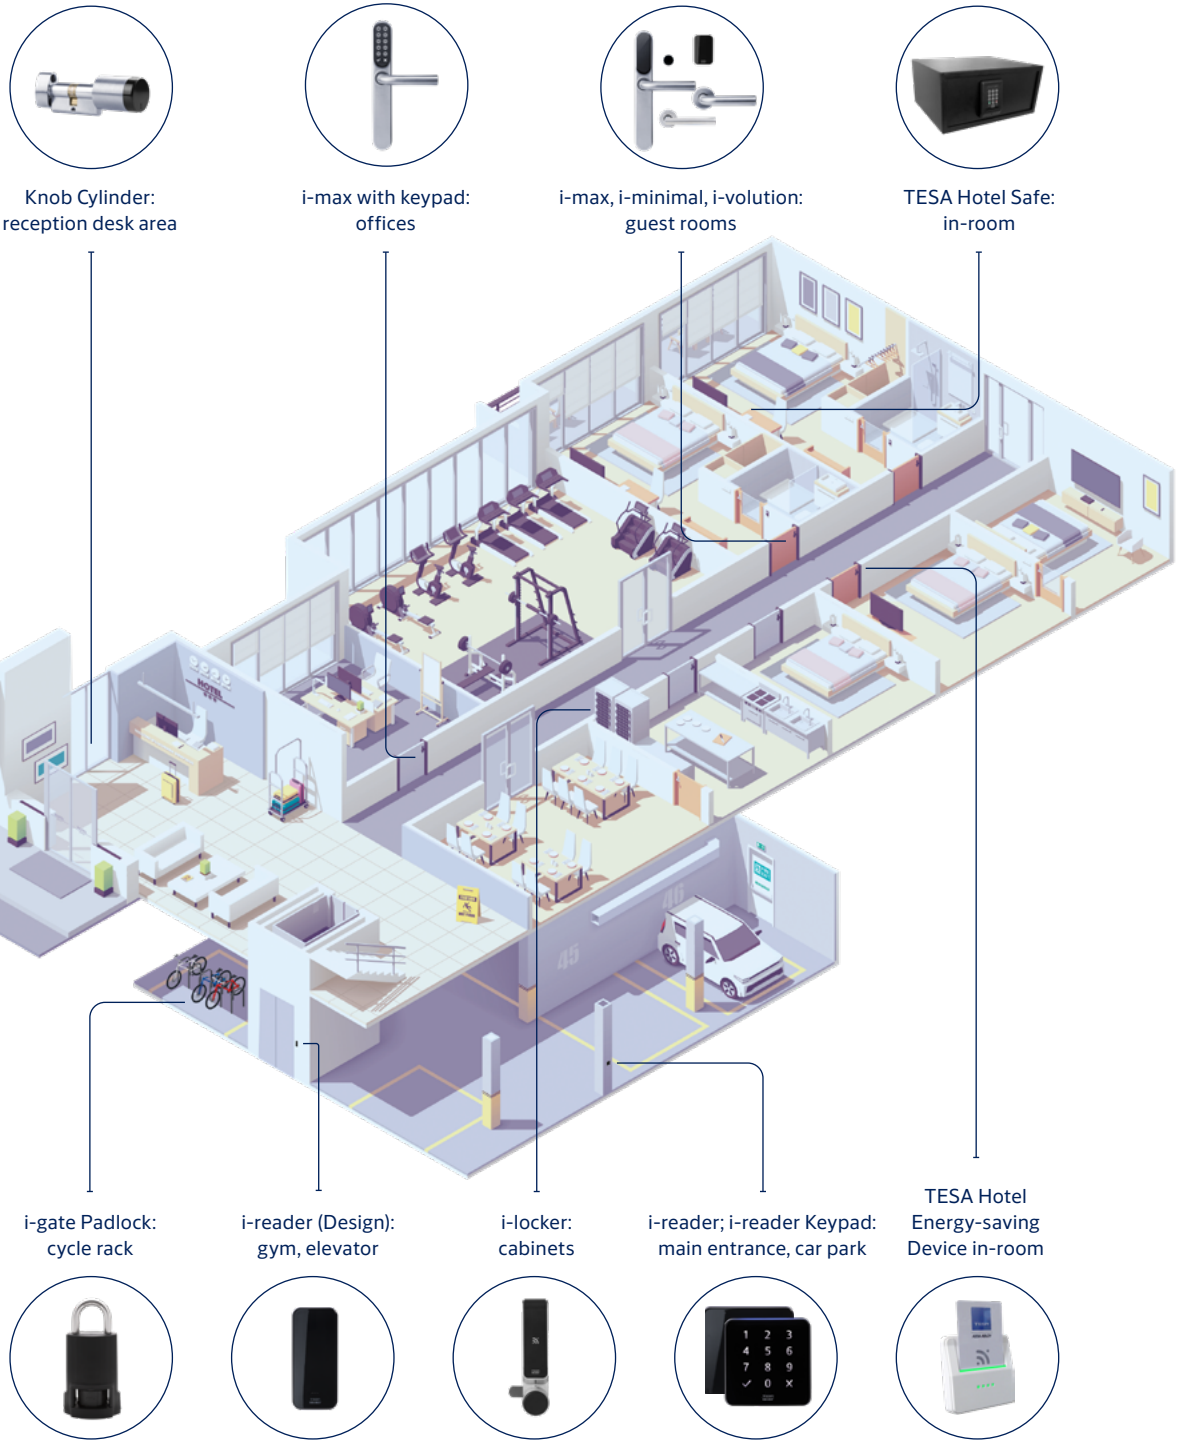
TESA Hotel: Digital access for your whole hotel

Designed for convenience, security and guest peace-of-mind, TESA Hotel devices are perfect for securing a wide range of rooms and communal spaces, whatever their compliance requirements.

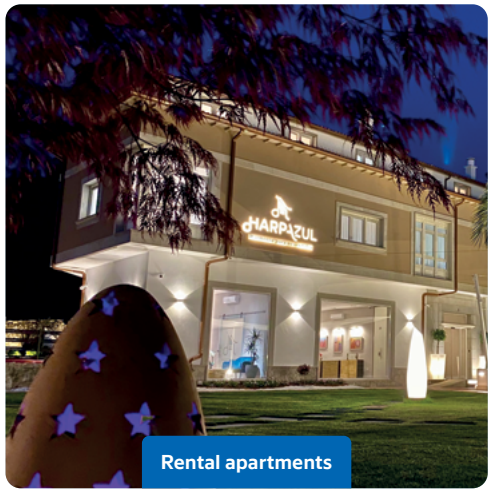
Versatile applications for almost any space
Devices are engineered to fit seamlessly and to provide control and security wherever you need them: guest rooms and suites, offices, cabinets, entrances, gates, lift (controlling up to 40 floors), shared spaces like the gym or pool area, and more.

Compatible with almost any door
TESA Hotel devices are suitable for wooden or glass doors, narrow profile doors, sliding doors, and emergency exits. They operate reliably indoors and outside, regardless of climate or weather conditions.

Compliance with the most important standards
TESA Hotel devices are built for toughness and reliability: they help ensure your hotel security complies with important regulations. Rigorous standards and certifications awarded to TESA Hotel digital locks include EN 179; EN 1906 Category of Use Grade 4; EN 1634 (Fire); EN 15684 Class 6; SKG; EN 14846 and more.



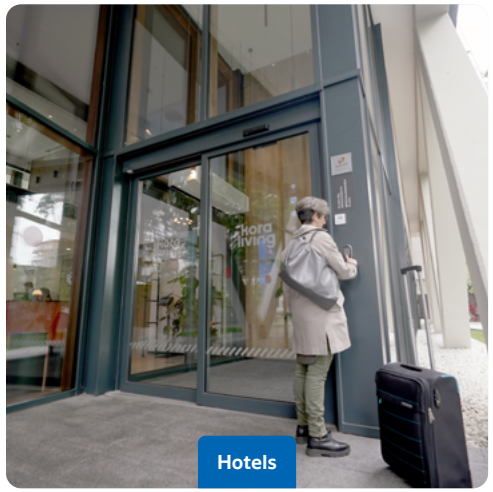
Customer references



Harpazul

Luxury rental apartments
with contactless, queue-less 24/7 check-in

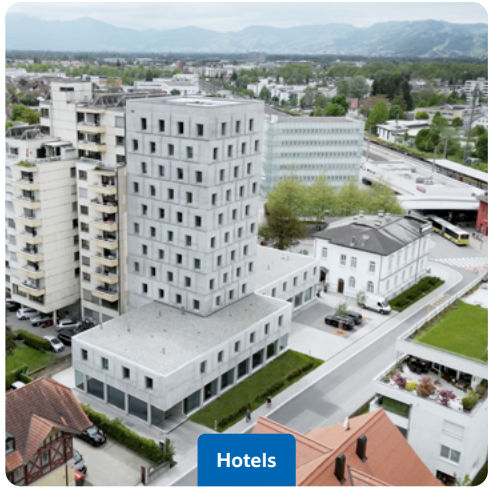
Before guests leave home, they receive their unique PIN for room and common areas. They enter without delay and settle in immediately. This visitor-friendly service also reduces the operating costs of 24-hour reception staffing.



Kora Green City

Digital access enhances guest experience and sustainability performance

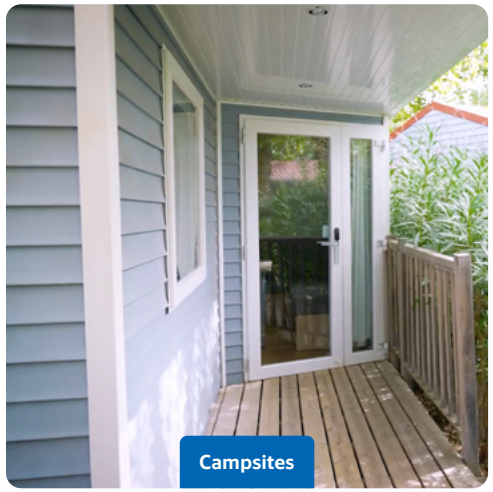
This *"eco-friendly accommodation"* digitalized access to enhance guest security and flexibility - and deliver inspiration, comfort and environmental responsibility. Room access via i-max PINpad and web-based software stream-line management.



Flint Hotel

Austrian hotel extends
its 19th-century property for 21st-century guests

The i-minimal lock and intuitive TESA Hotel software help hotel managers to offer guests a memorable stay. Self-service check-in and door access with smartphone keys minimize waiting. Fire doors are equipped with i-max locks.



Club Les Mediterranées

A user-friendly digital solution to the problems caused by lost keys

Providing access for several people staying in the same unit is easier with digital cylinders and programmable guest and staff bracelets. Families and reception staff enjoy greater convenience. Lost keys no longer cause expense or hassle.

Get your access ready for the future

Our experts will help you understand:

- Easily extend secure access across rooms and facilities
- Deliver a safer, smoother experience for guests and staff
- Lower operating costs and optimize energy use
