ABLOY®
DOOR PULLS

Architectural design

Part of ASSA ABLOY
The design consists of the product’s look, feel, comfort of use, and above all, its functionality. It involves understanding of needs, innovation, and the best of traditions. We want to make everyday life smoother and more secure for you.

The ABLOY PULLS bring all kinds of styles to the living environment: modern, traditional, youthful – whatever you desire. The creative solutions in the small details give the final touch to the well-considered whole.

Surface finishes

STAINLESS STEEL (RST) SATIN CHROME (HCR) POLISHED BRASS (K) CHROME (CR) SILVER-ANODISED (AHO)

ABLOY® ACTIVE

ANTIMICROBIAL ABLOY® ACTIVE

Now on all painted door pulls! ABLOY ACTIVE kills 99% of the most common bacteria in 24 hours and is also effective in combating MRSA. The products in this brochure are available in all RAL colour chart shades to special order.
ABLOY® PRESTO AND PARLAMENT PULLS

are produced from durable brass rod material. The pulls are intended for applications that require resistance to wear, and they are well suited for public buildings and shopping centres.

The variety of installation methods and placement alternatives help to create a new look in the door environment. The collection includes very subdued models that can be used to create a harmonious feel to the site. PRESTO pulls are available in aluminium versions as well.

ABLOY PARLAMENT door pulls are available as standard and custom-made products with the possibility to get the hand and body parts with different diameter thickness. Surface finishing options are available in several types.

ABLOY® PARLAMENT door pulls are available in heights of 200–1100 mm and in various configurations. These custom-made door pulls can be ordered with separate order forms.
ABLOY® ERGO AND FORMA PULLS

Feature a bolder design that can be used to highlight carefully selected entities and to create stylish solutions. These pulls are made of durable brass. Suitable applications for pulls include office buildings and public properties.

Note!
Handing of the pull must be specified when ordered as single pull.
ABLOY®
INOXI PULL COLLECTION

Clear-cut products and simplified design create a modern solution in the door environment. INOXI pulls are made of stainless steel. In order to maintain a consistent style, INOXI collection offers handles for both internal and external doors.

ABLOY® INOXI 137
Stainless steel
Available length: 266 mm

ABLOY® INOXI 137S
Stainless steel
Available length: 266 mm

ABLOY® INOXI 138
Stainless steel
Available length: 266 mm

ABLOY® INOXI 138S
Stainless steel
Available length: 266 mm

ABLOY® INOXI DP132
Stainless steel
Available length: 266 mm

ABLOY® INOXI DP133
Stainless steel
Available length: 266 mm

ABLOY® 750 CUSTOMIZED PULL
Can be dimensioned in accordance with the door, with the maximum length being 2,600 mm.
The most typical applications for rod pulls are metallic gates and warehouse doors equipped with surface locks.

**ABLOY® ROD PULLS**

**ABLOY® DP136 ELBOW PULL**
Aluminium pull
The characteristics of the elbow pull are best emphasised when it is used in hospitals.

**ABLOY® DP139 SUPPORT PULL**
Aluminium pull

**ABLOY® DP130**
Brass pull

**ABLOY® DP131**
Brass pull
ABLOY®
KNOB PULLS

The knob pulls are well suited to use with regular and sliding doors. The most common applications include the staircase doors of blocks of flats and the doors of commercial premises.

ABLOY®
3–16XS MINI HANDLE

Designed for pull-operated lock cases, this new mini handle stands out from the collection in its size. It offers classic style and provides the designer with freedom of choice for cases in which pulls are used on both sides of the door. The small, subdued handle, adapted from the ABLOY PRESTO collection, is at its best when you want to facilitate the opening of doors. This handle is practical in particular with pull-operated lock cases and access control. The handle material is durable brass, and its design is sufficiently subdued to highlight other elements of architecture. Also available as a profile door handle.
Tips for the selection and placement of door pulls

KEEPING THE HANDS UNHARMED
The pull must be attached far enough from the door frame. This ensures that hands won't get hurt when using the door.

SPECIAL REQUIREMENTS FOR MOTORISED LOCKS
The motorised locks always require a pull height of at least 400 mm. The lock case must be placed between the drillings of the pull without going through the lock. This is to ensure that the lock case does not become damaged during the installation of the pull.

SMOOTH AND EASY KEY USE
The pull must be attached far enough from the cylinder. If sufficient distance cannot be reached with a straight pull, a bent pull should be selected for the site. This enables smooth, hassle-free use of the key cylinder.

STYLISH PULL INSTALLATION
The attachment parts of a one-sided pull can be hidden with cover plates. The cover plate is always the same shade as the pull. Available for all pull thicknesses.

Installation options

Through fixing of a one-sided pull (K)
Distance of the cover plate from the door surface: 8 mm

Through fixing of a pull pair (LK)

1. Through fixing of one-sided pull with support plate
2. Surface fixing of one-sided pull with support plate

Surface installation of a wire pull with a screw (R)

ABLOY® SUPPORT PLATES DP039–041
Available with several surface finish options. The surface fitting of the support plate is always the same shade as the pull body when in the same delivery as the pull. An exception to this is the pulls made of stainless steel that have surface fittings with a satin finish. Recommended for use especially with wooden doors.

For DP039 20 mm pull body
For DP040 25 mm pull body
For DP041 30 mm pull body
