It’s time to set new standards for exit safety.

ABLOY® EXIT

The safest way out

ABLOY® EXIT
13,000 SPECTATORS
leave this way when the match is over.
Even when something unexpected happens.

FORESEEING THE FUTURE IS IMPOSSIBLE – ANTICIPATION IS NOT

When entering a building, few people think about how they are going to get out. We know that when we are in a stadium, we can always exit safely. We trust that the exit procedure for large crowds has been thought through. Particularly for unexpected situations.

Door environment safety is often associated with locking the doors and with authorised entry. However, personal safety also includes getting out, and therefore each building must have an exit that is safe in all situations. Exits must be unimpeded, passable and safe, even when used by large numbers of people. The doors must be easy to open in an emergency, and exit routes must be clearly marked.

The fact that your customers, employees or visitors do not think about exit safety is a sign of strong trust. Make sure you are worthy of that trust – offer users product packages that are easy to use and that promote safety. ABLOY® EXIT is your solution for better personal safety.
HALF A MILLION SCHOOL CHILDREN
go to school every day.
Has their safety been ensured?

While Abloy is known internationally for its super safe locking solutions, the development of exit solutions to promote personal safety is equally important to us. We use quality assurance standards to ensure a consistently high product quality, without compromises.

The ABLOY® EXIT solution is a result of solid product know-how and strong personal safety expertise. The solution is based on ABLOY® EXIT products, tested and certified in accordance with the latest standards. Exit safety is determined by standards EN179 and EN1125, according to which individual exit products must be tested in an actual door environment.

Besides certified products, we offer top-notch expertise and a comprehensive selection of training options. We provide experts in various fields with background information for design work and solutions to support decision-making. The various members of our distribution channels maintain their expertise through training provided by us — so you can always count on having access to up-to-date know-how.

When you choose Abloy, you will have a nationwide network of ABLOY® authorised locksmiths to support you. This ensures access to professional installation and maintenance services, original ABLOY® products and our comprehensive warranty.
**ABLOY® EXIT ENSURES EXIT SAFETY**

**EASE OF USE GUARANTEED**
The starting points in our product design are ease of use and reliability. The products are tested and certified by official testing organisations. Frequent follow-up tests, as required by standards, are used to maintain high product quality.

**PRODUCT QUALITIES DETERMINED BY STANDARDS**

**ABLOY® EXIT** products meet the highest standards in the field. The most important standards relevant to exits are EN179 and EN1125. They determine things such as the opening and closing force, corrosion resistance, wear resistance and fire properties of the door. The opening force determined by the standard makes the door light and easy to use.

**SUITABLE PRODUCTS FOR ALL APPLICATIONS**

Our products are designed and manufactured to remain reliable also in challenging situations and extreme conditions. **ABLOY® EXIT** products can be used in numerous applications, such as schools, offices and public buildings.

**ABLOY® QUALITY – A GUARANTEE OF PERSONAL SAFETY**

By choosing **ABLOY® EXIT** products, you elevate the safety of the application to a higher level.

**A SOLUTION THAT RETAINS ITS VALUE**

**ABLOY®** authorised locksmiths take care of installation and maintenance responsibilities for the entire life cycle of the products. **ABLOY® EXIT** is a safe investment in the future.

**QUALITIES SHARED BY ALL **ABLOY® EXIT** solutions**

- **DURABILITY**
  - Tested up to 200,000 cycles with 5 kg sideload.
- **ENVIRONMENTAL CONDITIONS**
  - Tested to ensure suitability in demanding conditions.
- **CE MARKING**
  - The product meets the safety, environment, and consumer protection requirements set by the European Union.

**PERSONAL SAFETY**

is guaranteed with **ABLOY® EXIT**.
