

# **ABLOY® FLEXLOCK**

## Key Control

**ABLOY® FLEXLOCK** Keyring Lock Series offers a unique additional feature to the existing level of **ABLOY®** patented, restricted key control systems. **ABLOY® FLEXLOCK** is an ideal locking solution for route key control.

**Optimum Key Management** - Once locked, keys cannot be removed from the cable without an authorized key to open the lock. This feature provides optimum protection when issuing keys to employees or contractors.

**Restricted Duplication** - Most keys can be duplicated at numerous retail outlets without any form of authorization required. We have always taken this risk seriously and therefore, offer various levels of key control allowing the end user to choose the ideal option for their specific requirements. Our High Security key control option includes patented and restricted key profiles with factory controlled key manufacturing.

**Millions of Combinations** - With over 360 million key combinations, expansion capabilities are abundant, thus ensuring the flexibility High Security systems demand.

**Excellent Customer Service** - Our team of professionals, with their extensive product knowledge, can assist your ordering needs ensuring accurate ordering information and speedy delivery.
