

A close-up photograph of a person's hand typing on a laptop keyboard. The laptop screen in the background displays a blue digital interface with various data points and charts. A semi-transparent blue rectangular box is overlaid on the bottom left of the image, containing white text. The overall scene is brightly lit, with a soft focus on the background.

ABLOY® OS INCEDO

**Management
of mechanical
keys**

ABLOY

More efficient and reliable key management

ABLOY OS INCEDO, our cloud-based access management application, provides digital solutions that combine the mechanical, electromechanical and keyless worlds.

A control module for mechanical keys provides a comprehensive picture of who is allowed to access different facilities in the property, and the keys or identifiers, which enable access.

Always up to date

The management module for mechanical keys allows the management of key distribution and storage at the company's offices and key handover locations. Thanks to the management module, the number of keys available for different facilities or handed over to users is always known. The company can also share

key management visibility and rights with different people safely and systematically, based on ABLOY OS INCEDO roles. It will be easier to manage and assess the property's overall security, and there is less need for separate systems when the necessary information is available through one system.

The most important benefits

- An even more comprehensive situational overview of your security, access rights and keys
- All necessary information and management in a constantly developing system
- Always up-to-date information on the situation with the keys and their users
- More controlled and systematic storage, handover and return of keys
- Role-based rights for key management and visibility

Features

CREATING LOCK SYSTEMS

- All patented ABLOY key systems can be connected to the management module for mechanical keys

KEY STORAGE

- Controlled keeping and transfer of keys between different storage locations
- Up-to-date information on the availability of and situation with keys in different storage locations

CHANGE LOGS

- An up-to-date register of key use, handover and return
- Information on keys registered as lost, missing, stolen or deleted for another reason

KEY HANDOVER PLANNING, KEY HANDOVER

- A clear view of key bookings, as well as their availability and situation
- Terms and roles defined by the administrator for key handover and return

+

- where and when the keys are handed over and to whom
- when the keys must be returned and to where
- what terms must be fulfilled

RETURN OF KEYS

- A clear view showing unreturned and returned keys
- Recording returns and release of keys in storage for distribution
- Quick filtering according to person, key or stamp

2/2021
