FOR TRUST IN PORTS

Critical Infrastructure Protection for the Ports Industry

ABLOY

For Trust in Ports

Ports are at the heart of global trade and transport, constantly repelling security threats from unauthorised access, cargo theft and smuggling. ABLOY Solutions go beyond security to add

operational efficiency, with high level security and safety. Assisting to meet the demands and regulations of the industry with a single holistic and future-proof solution is what we know and do well.

Securing the entire port infrastructure

Ports have a diverse infrastructure between private ownership, government authority, highly restricted, or require public access, such as cruise ship passenger terminals. Abloy has solutions for all areas that need to be secured, accessed and monitored.

Going beyond security in port solutions

Abloy delivers a future-proof digital portfolio with keyless, electromechanical and mechanical solutions. The Digital Portfolio for Critical Infrastructure Protection extend the boundaries of security and access control, enabling remote access control and simplified key management, with an audit trail feature. This digital convenience, efficiency and awareness saves time and increases security. The end result is operational efficiency to impact and improve all port infrastructure.

The latest Abloy technology for port safety, security and efficiency

PROTEC2 CLIQ™ and ABLOY® BEAT lead digital transformation and operational efficiency within critical infrastructure. They drive our remote lock and key control and management on-the-go, adding a new level of operational efficiency. PROTEC2 CLIQ is also well suited for port environments where mobile phone use is restricted. It also includes IP68 and ATEX approved padlock versions for high performance in any conditions. Combined with CIPE Manager creates visual overview and situational awareness over your port security system.

For all the administration and office areas in port operations ABLOY Electric Locks provide intelligent performance, with premium security, precise access control and sustainability. ABLOY® EXIT products also offer a high security door environment with an exit feature in every situation.

ABLOY Ports solution portfolio

Our port specific solutions and products are designed to meet high safety and security requirements.

PROTEC² CLIQ

PROTEC² CLIQ is Abloy's comprehensive and flexible key and access management system. It's a wireless solution with easy installation, electronic keys, and a 24/7 key control and audit trail feature. The PROTEC² CLIQ key can open both mechanical and electromechanical locks, so there's no need to make your entire system digital.

ABLOY BEAT

ABLOY BEAT is a new keyless locking solution that is operated with a digital key and secured with the Seos[®] credential technology, specifically made for critical infrastructure protection. It's managed with CIPE Manager or can be integrated into third-party systems, so you are always in sync with your security situation within all critical infrastructure, industry and businesses.

ABLOY Cam Locks

ABLOY Cam Locks are suitable for a wide range of applications including electricity cabinets, switch cabinets, distribution cabinets and other fittings.

Super Weather Proof Padlocks

The Super Weather Proof (SWP) Padlock range can withstand the harshest conditions from storm-driven salt water or fine desert dust. They also come with IP68 and ATEX approved electromechanical versions able to be linked to our CLIQ system.

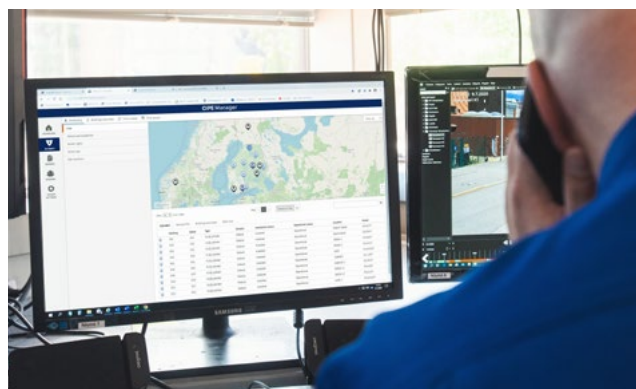

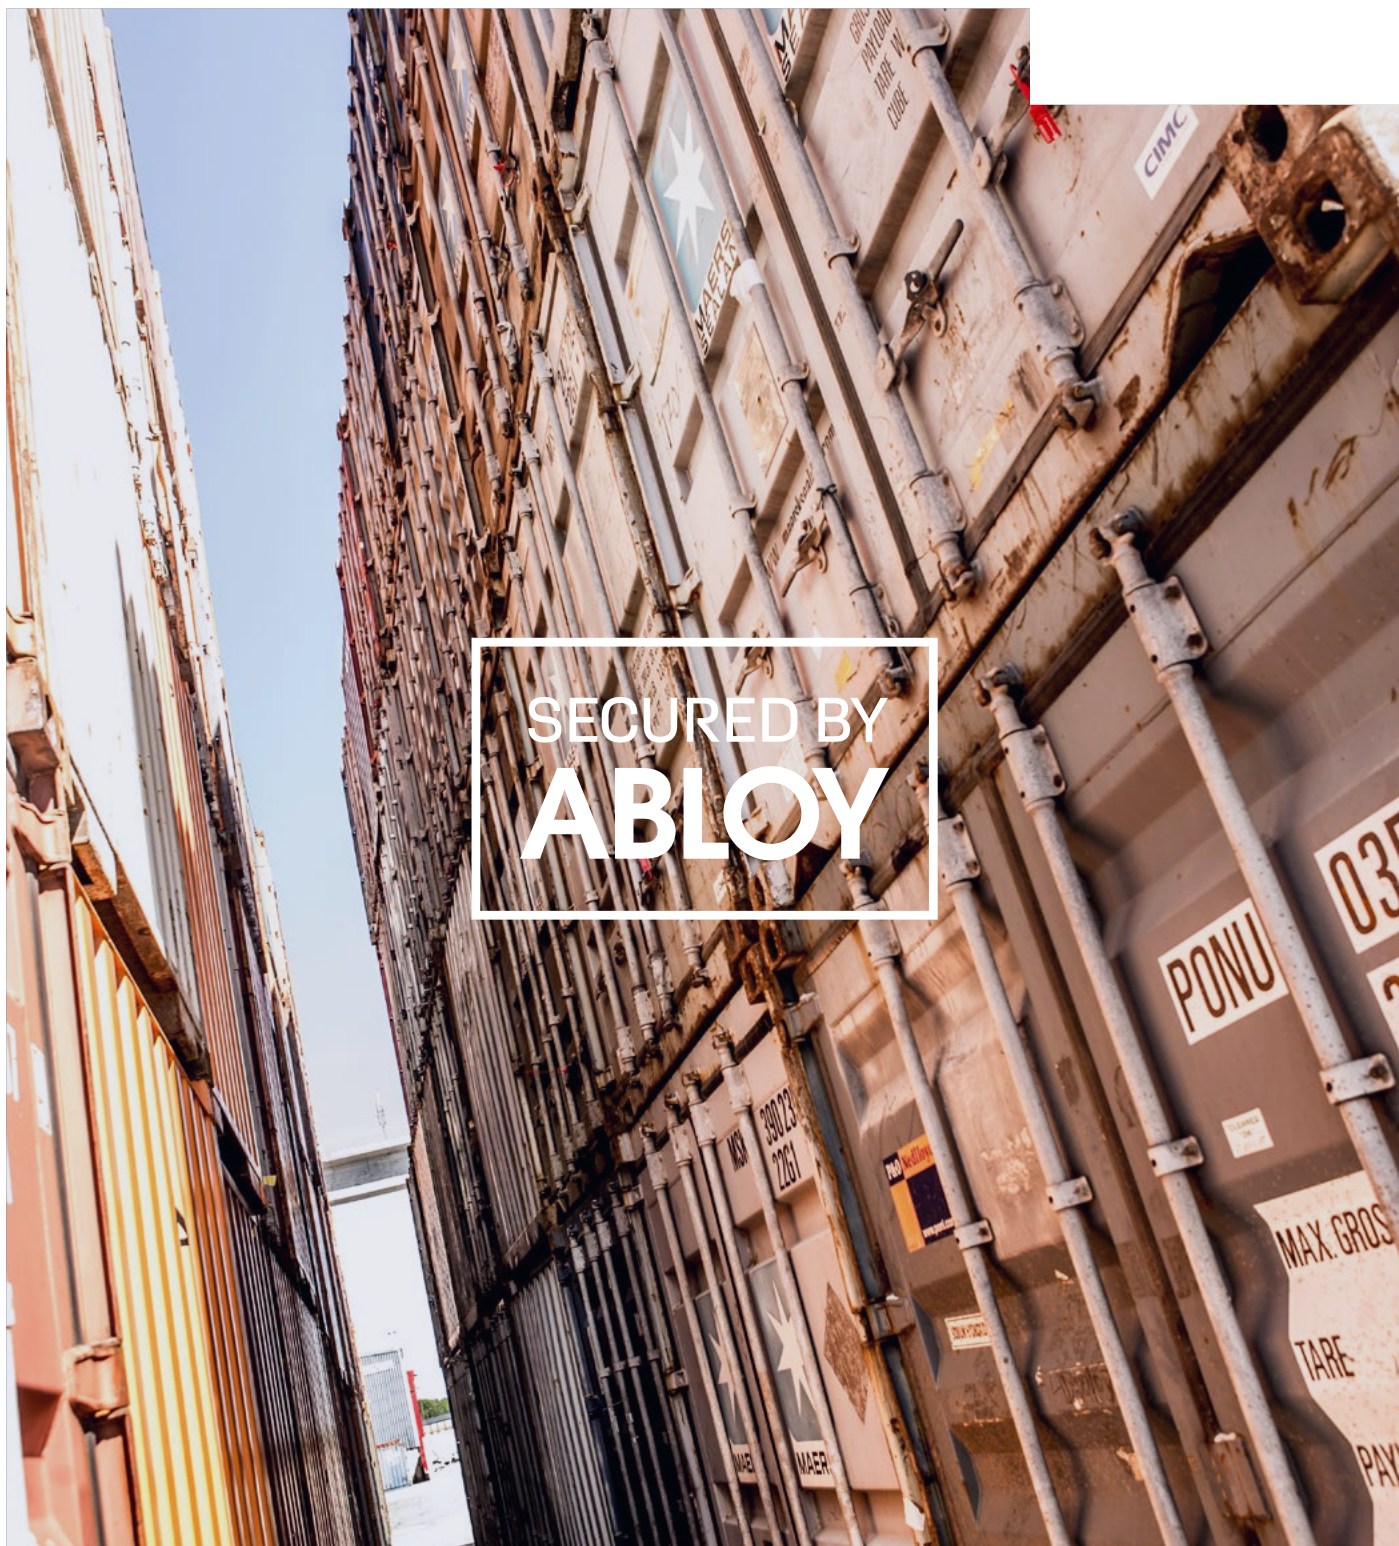

ABLOY Electric Locks

Designed for a seamless, aesthetic and smooth performance in every circumstance, the ABLOY Electric Locks are suitable for high security environments and easily integrated into your access control system.

CIPE Manager

Manage your keys, locks and user rights on the go with CIPE Manager, our user-friendly, visual interface. ABLOY BEAT, along with our other digital portfolio solutions, are managed with CIPE Manager.

SECURED BY ABLOY

ABLOY offers security and locking innovations dedicated to creating more trust in the world. Combining digital and mechanical expertise, Abloy Oy develops industry-leading security solutions that protect people, property and business. Abloy is part of the ASSA ABLOY Group, the global leader in access solutions. Every day, we help billions of people experience a more open world.

Abloy maintains Product Security Center at www.abloy.com/securitycenter. We recommend that You check the Center on a regular basis in order to be fully informed of product security updates, so that your knowledge of our products remains optimal.

It is the customer's responsibility to define the required level of security, whilst taking into consideration relevant factors for its operations. To achieve the overall level of security required in the customer's operations multiple layers of security must be in place. These include for example locking system, key management system, access management, CCTV and alarm system as well as physical security in a manner and level specified by the customer.
