

BRAXOS

Connected access management: CLIQ® Web Manager and braXos Composer integration

ASSA ABLOY

Seamless integration between CLIQ Web Manager (CWM) and the braXos Composer platform helps businesses enhance the security and functionality of their access management system.

Now part of the braXos connector library, the CLIQ Connector provides a secure bi-directional link between CWM and almost 100 different access control systems.

Experience a safer
and more open world

Unlock the future of access control

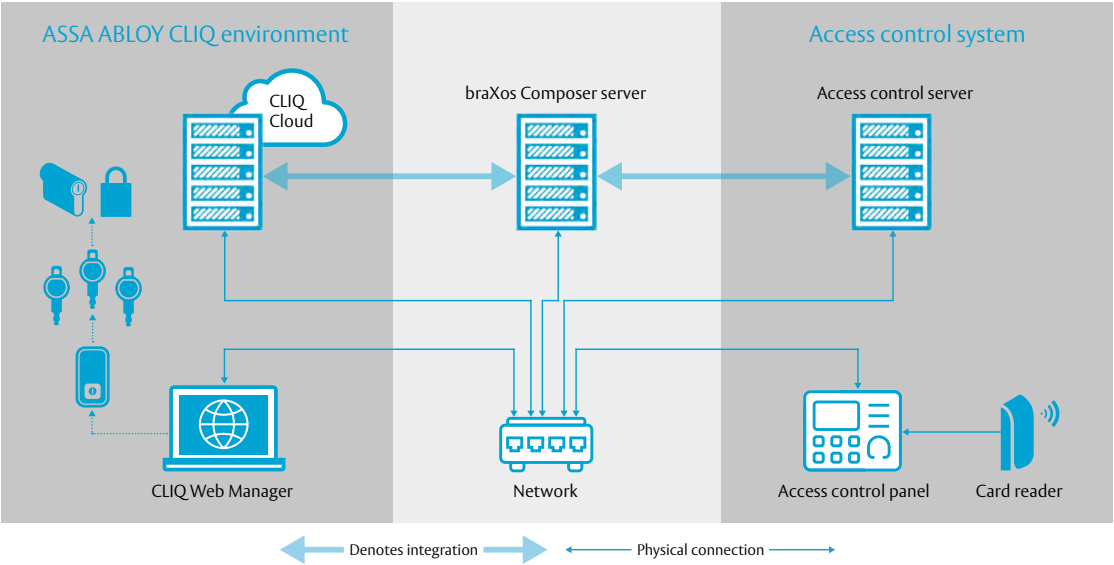

The partnership between braXos and ASSA ABLOY brings a groundbreaking integration between the braXos platform and CLIQ digital locking systems.

This collaboration unlocks the potential for CLIQ to seamlessly connect with nearly 100 access management systems, alongside HR platforms and building management tools.

By bridging these diverse systems, braXos extends the functionality of CLIQ far beyond traditional locking solutions, enabling businesses to manage access rights, streamline workflows, and enhance security with unparalleled ease.

How the integration works

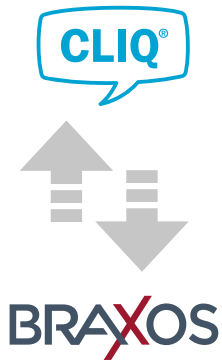

- 1. Users entered into the access control system (ACS) are synchronised to the CLIQ database
- 2. Users can be added, modified and deleted
- 3. Access to CLIQ locks can be assigned via the ACS using pre-defined access levels
- 4. Access levels can be added, modified and deleted
- 5. CLIQ access events can be inserted into the ACS audit trail (ACS-dependant) and/or stored in a customer's data warehouse (SQL DB, etc.)

Feature compatibility

Feature	Access control system										
	Gallagher	AMAG	Openpath ALTA	Feenics	OpenOptions DNA Fusion	Kantech	Honeywell ProWatch	Lenel.S2 netbox	C-CURE	NEDAP AEOS	Genetec
Provisioning of users	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
Access profile mapping	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
Audit trail mirroring (CWM and ACS)	✓					✓		✓		✓	

Take more control with CLIQ Web Manager and braXos Composer

By connecting CWM with braXos Composer, many more organizations of all sizes and types can enjoy the benefits of programmable key-based access management at almost any opening.

Using the CLIQ Connector, access and security administrators can handle daily user management tasks directly in their familiar access control system interface – adding and removing users, as well as assigning existing users with new or revised access profiles.

The integration also makes it possible to see individual audit trails within braXos Composer and/or the organization's access control system interface.

This innovative integration supports almost 100 different access control systems from leading global and regional manufacturers.

Connecting human resources solutions streamlines the onboarding process, eliminating manual data entry and reducing errors.

Key benefits of the integration

Work smarter, save time

Manage permissions across a range of complementary building systems and openings from one place

Monitor access in real time

Collect audit trails for contractors or visitors and investigate incidents without delay

Extend the reach of security

Choose from over 60 CLIQ wire-free cylinder types for doors, cabinets, gates and more

Simplify credential handling

Easily integrate battery-powered keys with other digital and mobile credentials, reducing manual entry

Choose convenient IT infrastructure

CLIQ Connector is verified for both SaaS and in-house access management

Increase the ROI of digitalization

Make building management an integral, innovative part of your organization's digital future

Why RPA tools matter for access control

In today's dynamic security landscape, RPA (Robotic Process Automation) tools like braXos are critical for integrating diverse systems. These tools eliminate the need for custom coding, enabling businesses to fully utilise API capabilities. With support from major tech players, RPA technology ensures:

Scalability: Seamlessly integrating new systems as businesses grow

Cost-effectiveness: Reducing the need for development resources

Increased efficiency: Automating repetitive tasks to free up valuable time

The ASSA ABLOY Group is the global leader in access solutions. Every day, we help billions of people experience a more open world.

ASSA ABLOY Opening Solutions leads the development within door openings and products for access solutions in homes, businesses and institutions. Our offering includes doors, door and window hardware, locks, access control and service.

ASSA ABLOY

BRAXOS

Founded in 2013, braXos Security Software is dedicated to delivering integrated, holistic security solutions to enterprises of all sizes. With deployments across five continents, braXos offers a comprehensive library of over 100 connectors, enabling seamless software-based integrations across various industries, including biotech, commercial and residential real estate, education, financial services, hospitality, and technology.

braXos specialises in connecting enterprise applications to security systems and building components, enhancing overall organisational security and efficiency.

By leveraging their extensive connector library, braXos enables organisations to build customised integrations that enhance security, streamline operations, and provide a seamless experience for employees, tenants, and visitors.

Over 100 additional connectors available
