ABLOY® eCLIQ

Digital Access for
Convenience and
Control

ABLOY

**People come
and go through
buildings like
never before**

The need to
manage access
has evolved
beyond security

New demands and challenges have arisen:

SECURITY

- Stop the security threat caused by lost keys
- Monitor access and events
- Boost cybersecurity
- Provide a safe workplace for staff and visitors

CONVENIENCE

- Issue users with intuitive credentials
- Simplify access and security management
- Work smarter with cloud management

FLEXIBILITY

- Make better use of offices and other workspaces
- Enable efficient, agile workflows
-

COST EFFICIENCY

- Save time and money wasted dealing with lost keys
- Reduce ecological footprint and improve sustainability performance
- Define a concrete ROI for security enhancements

Trust a global leader to show you smarter technologies

With eCLIQ you can secure and manage all access points digitally, to keep your people and assets safe. It is convenient, flexible and cost-efficient – bringing peace of mind to everyone.

How your organization benefits from eCLIQ

CONTROL YOUR BUILDING

- You decide who goes where, and when, by issuing access for each user or cancelling it with a click
- Set time-limited access rights and resolve lost-key issues faster

UPGRADE SITE SECURITY

- Quickly eliminate any security risk from lost keys and audit cylinder or key usage at any time
- Add time restrictions and key revalidation to create personalized access permissions

SAVE MONEY

- No more cylinder changes because of lost keys
- Improved workflows through flexible access management
- CLIQ integrates with existing third-party software, offering system management flexibility

PROTECT EVERYWHERE

- Cable-free cylinders for every application, to secure doors, gates, cabinets and more
- Users carry one programmable key for all their access points

FIT FAST AND WIRE-FREE

- Swap an existing mechanical cylinder for an eCLIQ cylinder with one screw and no drilling

SAVE EVERYONE'S TIME

- No more managing multiple keys and keycards, changing compromised locks or searching for a keyholder
- One key opens all access points for greater user convenience
- No more physical key handovers as access rights can be changed via Bluetooth

BE ENERGY-EFFICIENT

- Power is supplied via an easy-to-change standard battery with a typical 10-year lifespan* inside each key

* excluding Connect key

The CLIQ system at a glance

The CLIQ system is built around programmable keys that are designed to work seamlessly with a wide range of cable- and battery-free cylinders. Access rights for keyholders can be managed via an intuitive central software platform, providing full control and flexibility. Keys can be quickly activated and updated using our user-friendly programming devices.

PROGRAMMABLE SMART KEYS

CABLE- AND BATTERY-FREE CYLINDERS AND PADLOCKS

MANAGEMENT SOFTWARE AND APPS

PROGRAMMING DEVICES AND READERS

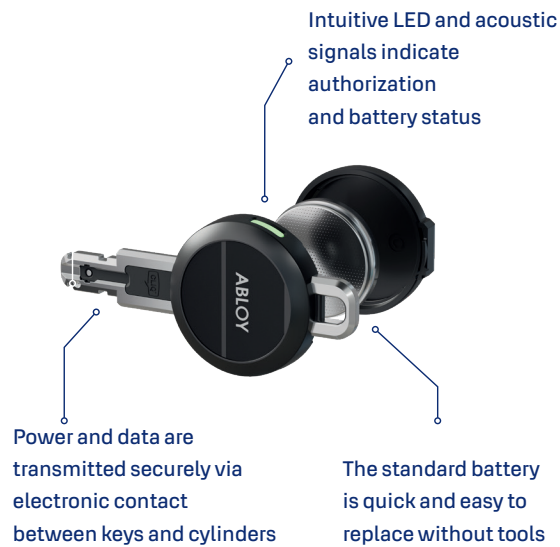

Programmable smart keys

The right key for the job – whatever it is

Our range of eCLIQ keys ensures every user has a key tailored to their workflow – capable of opening more than just doors. Access rights can be updated instantly, allowing permissions to adapt as requirements change.

Programmable smart keys

- Fully electronic with only one key profile
- A single key can unlock all cylinders and padlocks
- Access rights can be updated remotely using the Connect key and app, saving additional car journeys to collect or update keys
- Power is supplied by an easy-to-change battery with a typical lifespan of 10 years for a standard user key
- Withstands any weather conditions and extreme environments (IP67 and optional ATEX protection)
- Battery covers with RFID chips available for all keys

Choose the right key	Basic	Professional	Connect
10-year battery life (approximately 100,000 operations)	✓	✓	2 years
Dust- and weather-proof (IP67)	✓	✓	✓
Convenient LED feedback	✓	✓	✓
Additional sound feedback		✓	✓
Update access rights by desktop, wall or a mobile PD	✓	✓	✓
Update access rights via app/Bluetooth			✓
Unlock doors, cabinets, elevators, machines, gates and more	✓	✓	✓

The keys come with different features, such as access authorization, time/schedules/revalidation, audit trails or directly programmable, depending on the type of key.

Cable- and battery-free cylinders and padlocks

Our wide range of eCLIQ cylinders secures all your access points – from interior and exterior doors to gates, lockers, cabinets, alarm systems, and more. They are quick and easy to install, with no wiring required.

**FITTING AN eCLIQ CYLINDER IS QUICK AND EASY
– NO WIRES MAKES IT THE IDEAL CHOICE FOR
RETROFITTING**

Cylinders

Secure, reliable... and beyond doors

- Fully electronic cylinders – also available in shorter lengths
- More than 60 eCLIQ cylinder and padlock types
- Simply swap an existing mechanical cylinder for an eCLIQ cylinder with just one screw change
- No drilling and no wires makes them the ideal choice for retrofit or installation in historic buildings
- Maintenance-free for up to 200,000 cycles due to an innovative integrated lubricant depot inside each cylinder

Future-proof chip generation with AES encryption and rapid processing speed with efficient energy management

A photograph of two men in a meeting. The man on the left is older, with grey hair and glasses, wearing a green button-down shirt over a white t-shirt. The man on the right is younger, with long dark hair and glasses, wearing an orange sweater. They are both looking at a laptop on the older man's lap. The background shows a window with light-colored curtains. A glass of water and a smartphone are on a small table in the foreground.

CLIQ IS INTUITIVE TO MANAGE
AND CAN BE SCALED TO SUIT
BUSINESSES OF ANY SIZE

Software and apps

Whether you have a small business with only a few access points or oversee a larger organization with multiple sites, our flexible software solutions make it easy to control and manage your system.

Software and apps

- A choice of software options for managing your CLIQ system is available for any size of business, including smartphone, hostig onsite and SaaS via the cloud
- Integrations with leading third-party systems are available through CLIQ Web Manager, such as Genetec, Lenel, Traka, and braXos – or you can build your own using our APIs
- Manage schedules for individual users and cylinders, audit trails, update access rights of user keys via the desktop, mobile or wall programming device
- Two-factor authentication enhances user security

Choose the right management software	 CLIQ Go	 CLIQ Local Manager	 CLIQ Web Manager
Business size

**eCLIQ PROVIDES
CONVENIENT WAYS TO
UPDATE EVERYONE'S
ACCESS**

Programming devices and readers

Our programming devices (PDs) allow you to customize your system for different users and applications. The new readers can also control a variety of third-party devices, such as electric strikes and motorized locks.

Programming Devices and readers

- PDs act as the secure data transmitter between management software and programming key
- Key access rights can be granted or revoked remotely via wall programming devices or a smartphone
- The CLIQ Updater adds a secure, cost-efficient outdoor update point by simply connecting it to an existing Wall PD (Gen 2)
- CLIQ Readers provide secure integration with third-party devices, extending the range of applications for CLIQ keys
- Robust outdoor devices with stainless steel housing protecting against weather, dust and vandalism

Choose the right key programmers	Desktop PD	Wall PDs	Reader and Updater	App
Secure communication between key and programming device	✓	✓	✓	✓
Power supply	USB	12–24V mains or PoE	12–24V mains	
Optimized for centralized management	✓			
Optimized for decentralized management		✓	✓	✓
Compatible with all eCLIQ keys	✓	✓	✓	✓
Safe for use outdoors and protection against dripping water		✓	✓	
Bluetooth connectivity				✓
Activate third-party devices via free output*		✓	✓	

* Optional for the CLIQ Wall PD (FO must be specified during the ordering process and cannot be retrofitted)
The CLIQ Updater mirrors all available functions of the connected Wall PD

Trusted across Europe and beyond

OFFICE & ENTERPRISE

World Trade Center Amsterdam needed to electronically upgrade more than 1,000 doors and chose the wireless, easy-to-install eCLIQ system to more efficiently manage the many contractors and suppliers who enter the buildings every day

MULTI-RESIDENTIAL

GWW Wiesbadener Wohnungsbaugesellschaft in Germany was looking for an easy-to-install, digital solution to secure the entrances, communal and technical doors of all its residential buildings and found it in eCLIQ

INDUSTRY & UTILITIES

Electricity supplier **K&F Drack** in Almtal, Austria chose eCLIQ for its flexibility in installation and use, as well as for its low maintenance requirements

ENTERTAINMENT & CULTURE

Humboldt Forum Museum in Berlin, Germany needed a flexible solution to support differing room usage. eCLIQ offered a very high standard of security and simple access authorisation management

HEALTHCARE

Installing eCLIQ on the **NHS Raigmore Hospital** site in the UK meant that facility managers had a detailed overview of who was accessing rooms, which is essential for hospital security

PUBLIC FACILITIES

The commune **Saint-Jacut-de-la-Mer** in France faced growing security management difficulties for their municipal buildings, so unified and simplified access with eCLIQ

Get your access ready for the future

GET IN TOUCH

Abloy maintains Product Security Center at www.abloy.com/securitycenter. We recommend that You check the Center on a regular basis in order to be fully informed of product security updates, so that your knowledge of our products remains optimal.

It is the customer's responsibility to define the required level of security, whilst taking into consideration relevant factors for its operations. To achieve the overall level of security required in the customer's operations multiple layers of security must be in place. These include for example locking system, key management system, access management, CCTV and alarm system as well as physical security in a manner and level specified by the customer.
