

Security Solutions for Commercial Offices

ASSA ABLOY

Experience a safer
and more open world

Providing a safe, secure commercial environment

The significant changes that have taken place in working patterns in recent years call for businesses to adapt flexibly to the needs of their employees, including all aspects of security.

To ensure the safety of employees and the public at all times an agile approach is necessary. ASSA ABLOY provide a comprehensive range of access control solutions compliant to Fire & Escape building regulations to facilitate hybrid and co-working, while maintaining security and life safety.

As trusted providers of security solutions, ASSA ABLOY answer stakeholder concerns in many businesses in many Countries, providing products, expertise and the depth of support from a global business to meet the specifications of some of the most demanding organisations.

We understand your challenges

Developing resource efficiency across commercial facilities

Post pandemic, commercial spaces are adapting to support a more flexible environment for its users. With reduced volumes of staff in the spaces, ASSA ABLOY have a portfolio of electronic and digital devices to lock, control and monitor meeting rooms, private offices, communal spaces and main entrances.

The way we work, the environments and facilities we use have changed forever, and now our people and the buildings used also need to adapt to these changes.

Easy tailoring of every user's access rights to match their requirements. Access permissions may also be time-limited, which is perfect for meeting room bookings. Privacy control options for certain areas conforming to GDPR legislation.

Systems that can scale instantly up or down across multiple sites, to meet a space's evolving security needs or usage. Remote monitoring across premises allows out of schedule access and flexibility.

Sustainability through safety and free movement

Reduced energy use and avoiding the depletion of natural resources through innovative design and deployment are just two of the methods ASSA ABLOY draw upon to help Commercial premises maintain an ecological balance in pursuit of environmental sustainability.

ASSA ABLOY can help you to reduce electronic locking energy consumption by 50% or more, through innovative solutions while also improving safety and security for the buildings occupants.

This is achieved by preserving free movement across your Commercial environment while maintaining staff safety through improved movement management and selecting the right solution for the applications. The ASSA ABLOY portfolio includes a comprehensive range of access control and locking systems to help you achieve sustainability targets while maintaining employee safety.

Improving the staff experience

We understand that your employees experience is important. Helping users of the commercial spaces feel welcome and safe throughout their time there is a key objective. ASSA ABLOY can help, from receiving a request to install an app that provides access into the building on the first day, that can also be used to access parking facilities or bike storage.

Imagine from the employer or building manager's perspective the operational efficiencies and cost savings by not having to hand out keys, or replace lost or stolen keys. A solution integrated into the commercial management system to provide real time information regarding who has arrived and which spaces are still available, with updates and room changes sent directly to the user's mobile device.

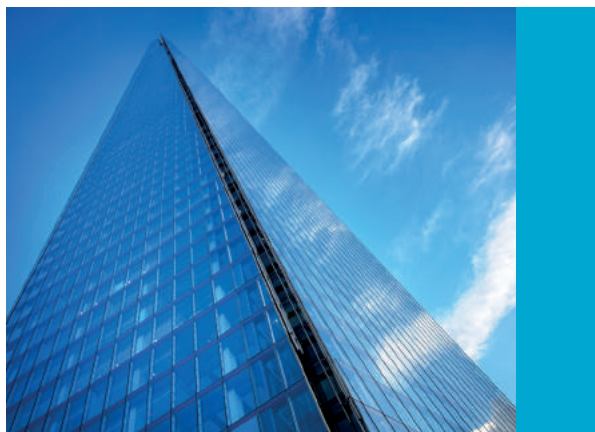

Safe and Secure environment

We give you the capability and flexibility to control access while retaining convenience at your premises.

Full time staff, visitors and temporary contractors can be given access specifically for the areas required, including office resources, cabinets, lockers, lifts and even car parks. Daily and contract time limitations can be conveniently set for each individual.

Where staff and visitors use lockers, they can have personal keyless access which can be changed digitally when they leave. No more lost keys!

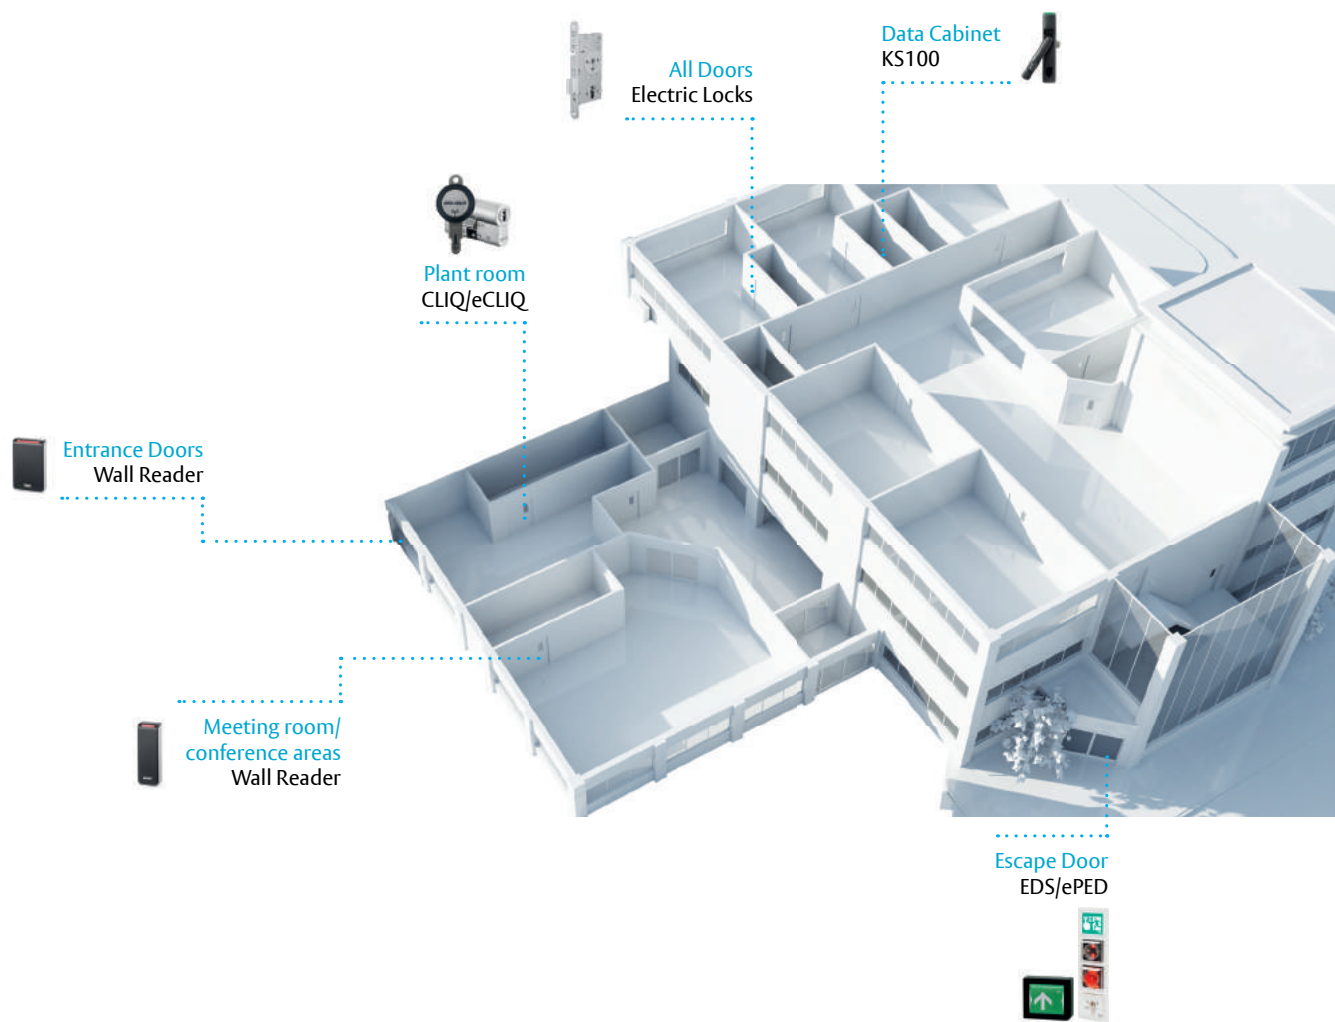

Customised solutions can be provided for secure rooms and buildings such as IT hubs and executive offices. Our solutions enable you to remotely lockdown / unlock entire buildings or specific areas and have the ability to delay egress from emergency escapes, which can direct personnel through specific escape routes in the event of an emergency.

Where our access control solutions can help you

Whether you want to install a completely new access and security system or upgrade your existing system, ASSA ABLOY has a comprehensive range of access control solutions to fulfil all your needs, in all areas, cost effectively.

Common Areas		Emergency and Temporary Situations		Restricted Areas	
Entrance doors		Lockdown		IT Infrastructure Hub	
Office areas		Preventing unauthorised entry		Storage areas	
Car Park and Barrier Entrances		Emergency Escape		Chemical stores and cabinets and waste management	
Lifts		Emergency Lockdown / Emergency Open	 	Server racks	
Meeting and Conference rooms				Plant rooms	
Lockers and Communal storage				Cash Office and ATM storage	
				Delivery and Logistics	

How our access control solutions can help you

ASSA ABLOY offer a complete package of digital access control, electromechanical and mechanical locking systems to fulfil virtually any locking solution you need.

A comprehensive security ecosystem: integratable, fire safety & escape compliant locking solutions to meet BS EN 179, BS EN 1125 and BS EN 13637, suitable for credentials including cards, fobs, mobile phones and keys.

Digital Access Solutions

We create adaptable products and easily installable systems to provide user-friendly, flexible access management with multiple credential options. Managers and approved administrators can specify individual access permissions to ensure only authorised access is permitted. You can monitor activity with full audit trails and manage required changes quickly and conveniently.

Mobile Credentials

Credentials to access areas, rooms and cabinets need to be closely controlled, but they also need to be convenient and practical. With ASSA ABLOY access control systems they only need a single credential to access all the areas they need via a mobile device such as a smartphone or smart watch.

Digital Key Systems

We live in a connected world that offers tremendous capabilities and opportunities, but it also creates new cyber security threats and challenges. ASSA ABLOY's digital key systems combine the benefits of digital technology, flexible access control and audit trails, and so much more, with the security of market leading, fully tested, resilient mechanical locks.

Electric Locks & Electric Strikes

Wired locking solutions such as electric locks and strikes are recommended for external doors and doors which require high security, such as offices, labs and IT hubs. These products are tested to fulfil UK and European Fire & Escape standards, helping you meet your regulatory requirements, as well as helping you implement a Lockdown situation.

ePED - Escape Door Systems

Escaping from a building can be a matter of life and death, but equally you may also need to prevent occupants leaving site without permission through emergency exits. Our ePED system is a specially designed compliant solution to ensure people can escape safely. Additionally ePED maintains building security in the event of an emergency and is your means of complying with BS EN 13637, the standard for electronically controlled doors along escape routes.

Benefits

- Products and systems proven to be durable and reliable in commercial buildings globally
- We can help you meet all required building regulations safety and security standard
- Convenient controlled access for workers and visitors, even in high footfall areas
- Cost effective access control solutions with virtually no disruption, as most products can be easily retrofitted

Trusted by Global Businesses

Major companies trust Abloy UK to protect their assets – including commercial offices, distribution centres and data centres

Abloy products are trusted to protect assets globally with an unrivalled range of proven solutions, to provide the ultimate combination of security, reliability, accountability and convenience.

Amazon Web Services (AWS), Dublin

Amazon Web Services is based in Ranelagh, Dublin, and provides an infrastructure platform in the cloud that powers hundreds of thousands of businesses in 190 countries around the world. AWS specify Abloy Electric Locks on all access control doors to ensure security, reliability and Fire & Escape compliance throughout the entrances, offices, distribution centre and data centre.

Google EMEA projects

Abloy Electric Locks are specified as standard for ongoing Google projects in the UK and Europe. Abloy packages including electric DIN locks, cylinders, door loops and door furniture are specified by Google for access control doors including entrances, offices, meeting rooms and IT dept. designed to be compliant with respective local Fire and Escape building regulations and door designs.

Facebook, London, Kings Cross site

Facebook's new flagship Headquarters in London was opened in March 2022 after a three-year build and fit-out, with a total capacity of over 6,000 workstations. A range of Abloy electric DIN locks and accessories has been specified on all access control doors to comply with Fire & Escape building regulations, and to ensure reliability in high traffic areas.

Clockwise

Across all Clockwise locations, internal private office doors, "Zoom rooms" and meeting rooms - as well as communal area doors and external doors - are now secured with ASSA ABLOY devices and managed by an Incedo Business Cloud access control system.

The modular Incedo platform-based solution incorporates wired and wireless door locking devices, plus a choice of physical and mobile credentials, from across the ASSA ABLOY range.

Credit Suisse, Canary Wharf, London

Around 5,000 employees work for Credit Suisse in Canary Wharf, London. The high-rise dating from the 1980s was fully renovated between 2015 and 2019. Abloy products are specified by Credit Suisse's preferred security installer in the UK and across their European premises, and in their Canary Wharf offices Abloy supplied doors, electric DIN locks, door loops and furnishings to provide security and comply with Fire & Escape building regulations.

Sumitomo Mitsui Banking Corporation (SMBC), London

Extension and major refurbishment took place to accommodate the new SMBC EMEA Division regional headquarters in London, where 352M.80 locks from Abloy UK have been installed with EDS display terminals with read-in, read-out to provide access control. These locks meet BS EN 13637 monitored electronically controlled escape systems and have the capability to help in dynamic lockdown situations in case of emergency. These have been installed in all SMBC's public and corporate areas.

Hyatt Regency Hotel Office Spaces, Dubai

The Hyatt Regency Dubai Creek Heights 5-star hotel which has 464 luxury rooms spread over 34 floors and caters to both business and leisure travellers, installed a mix of online and offline Aperio electronic access control devices in the office areas.

The future-proof solution chosen was a combination of Aperio online E100 escutcheons and offline E900 escutcheons. The doors are operated with standard RFID smartcards and Aperio enables security managers to monitor doors remotely, to open doors wirelessly, and to create audit trails for specific staff-access only doors on demand.

The ASSA ABLOY Group is the global leader in access solutions. Every day, we help billions of people experience a more open world.

ASSA ABLOY
Opening Solutions

ASSA ABLOY Opening Solutions leads the development within door openings and products for access solutions in homes, businesses and institutions. Our offering includes doors, door and window hardware, locks, access control and service.
