**This is
your
day-to-day**

SMARTair
is the
solution

The SMARTair wireless access control system is built on years of experience serving security needs across the education sector, combined with innovative use of new secure technologies. More than just better locking, SMARTair offers peace of mind. Its versatility, installation flexibility and responsiveness can solve every access control need at your education institution — guaranteed.

**Easy
to
install**

The installation
doesn't require
special wiring
or preparation

**No
more
keys**

Forget
about the hassle
of carrying tens
of keys. Go for
our different
credentials

**Real-time
management
from any
devices**

Use your
smartphone, tablet
or computer to
manage users, doors
and time schedules,
get audit trails and
more

**Safe
and
convenient**

Enables a
convenient
management
of credentials
when they get
lost or need to be
cancelled

**Adaptable
to individual
use**

No matter if the
staff has different
schedules, the
system controls
traffic flows in a
safe and efficient
way

How to manage your whole system in a simple, agile way?

SMARTair is the answer: a powerful access control system that offers an intelligent step up from keys. Is the cost-effective alternative that sits easily alongside an existing system, and with multiple management solutions.

Managing contractor or visitor access

The facility manager can authorise, refuse or modify access for occasional users in real time

Avoid security incidents

The system is compatible with panic bars, emergency exits and more

Switch to an intelligent environment

SMARTair access control system tailored for you

We create adaptable products and easily installable systems. High schools' daily activity won't be disrupted during set-up, or when extending their system with devices for secure entrances, car parks, barriers, lifts, lockers or any type of door.

In addition, our system design makes it easy to embrace organisational changes in a scalable way, with easy, future-proofed investment.

How does it work?

For classrooms and common areas: SMARTair escutcheon

- Ideal solution to equip any door
- Robust slim design
- Available for multiple door profiles and finishes
- Optional keypad for added PIN security

For entrance doors, car parks, lifts and common areas with high traffic: SMARTair wall reader

- Can operate electrically controlled devices
- Optional keypad

For staff offices: SMARTair knob cylinder

- Easy to retrofit by simply replacing an existing cylinder without drilling

For students and staff: SMARTair cabinet lock

- Configurable in the same system without the need for an extra module

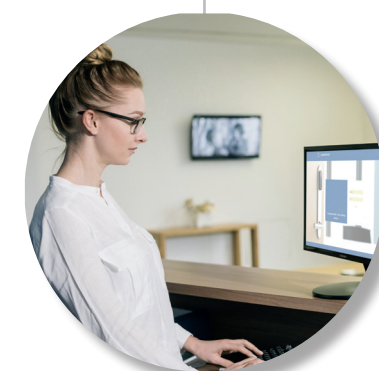

Cards, tags, bracelets and App

Different types of credential enable staff and students to carry their "keys" in the most convenient way. The system is compatible with all leading RFID technologies.

SMARTair Openow

- For the convenience of opening doors with a smartphone where you store your credential
- Available for Android and iOS

TS1000: Manage the system at your desk or on the run

- SMARTair enables secure and flexible administration of your facility, even if your site grows
- Our intuitive, easy-to-operate management software puts you in total control
- Managenable from anywhere with an internet connection
- Remotely unlock doors or generate audit trails

A stylized map of Europe is shown in the background, composed of a grid of grey dots. Two blue location pins are placed on the map: one in the north-central region (Denmark) and one in the west-central region (Brittany).

Lycée Kreisker Brittany

“SMARTair® was the best choice because of the technical support and the possibilities offered in terms of programming.”

*Stéphane Cloarec
Facility Manager
