- Refurbished sport palace with a capacity of 16,000 visitors
- Various restaurants
- 1.8 million visitors p.a.

Challenge

With hundreds of events every year, Ahoy was looking for a secure and flexible locking system with maximum manageability. The present mechanical locking system was no longer ‘watertight’ due to the loss of keys.

The solution also had to adapt to the existing access control system.

Solution

Registration, authorization and security. Ahoy had a number of requirements for its new locking system. Around 150 doors in the Sport Palace and the Plaza were equipped with Aperio™. Aperio™ made a simple security upgrade possible. Customer installation costs were limited by only minimal modifications to the existing doors and by making use of the existing card readers.

It is now possible to exactly see who was the last person to be in a room and manage access rights for each door. With the easy to expand with Aperio™ wireless lock technology, Ahoy is well prepared for the future.
