FOR TRUST IN PORTS

Critical Infrastructure Protection for the Ports Industry

ABLOY

For Trust in Ports

Ports are at the heart of global trade and transport, constantly repelling security threats from unauthorised access, cargo theft and smuggling. ABLOY Solutions go beyond security to add operational efficiency, with world-leading digital technology. Proven and tested in the busiest and harshest conditions in critical infrastructure, ABLOY Solutions are resilient in all port environments to ensure that trade, cargo and business flows safely without interruption.

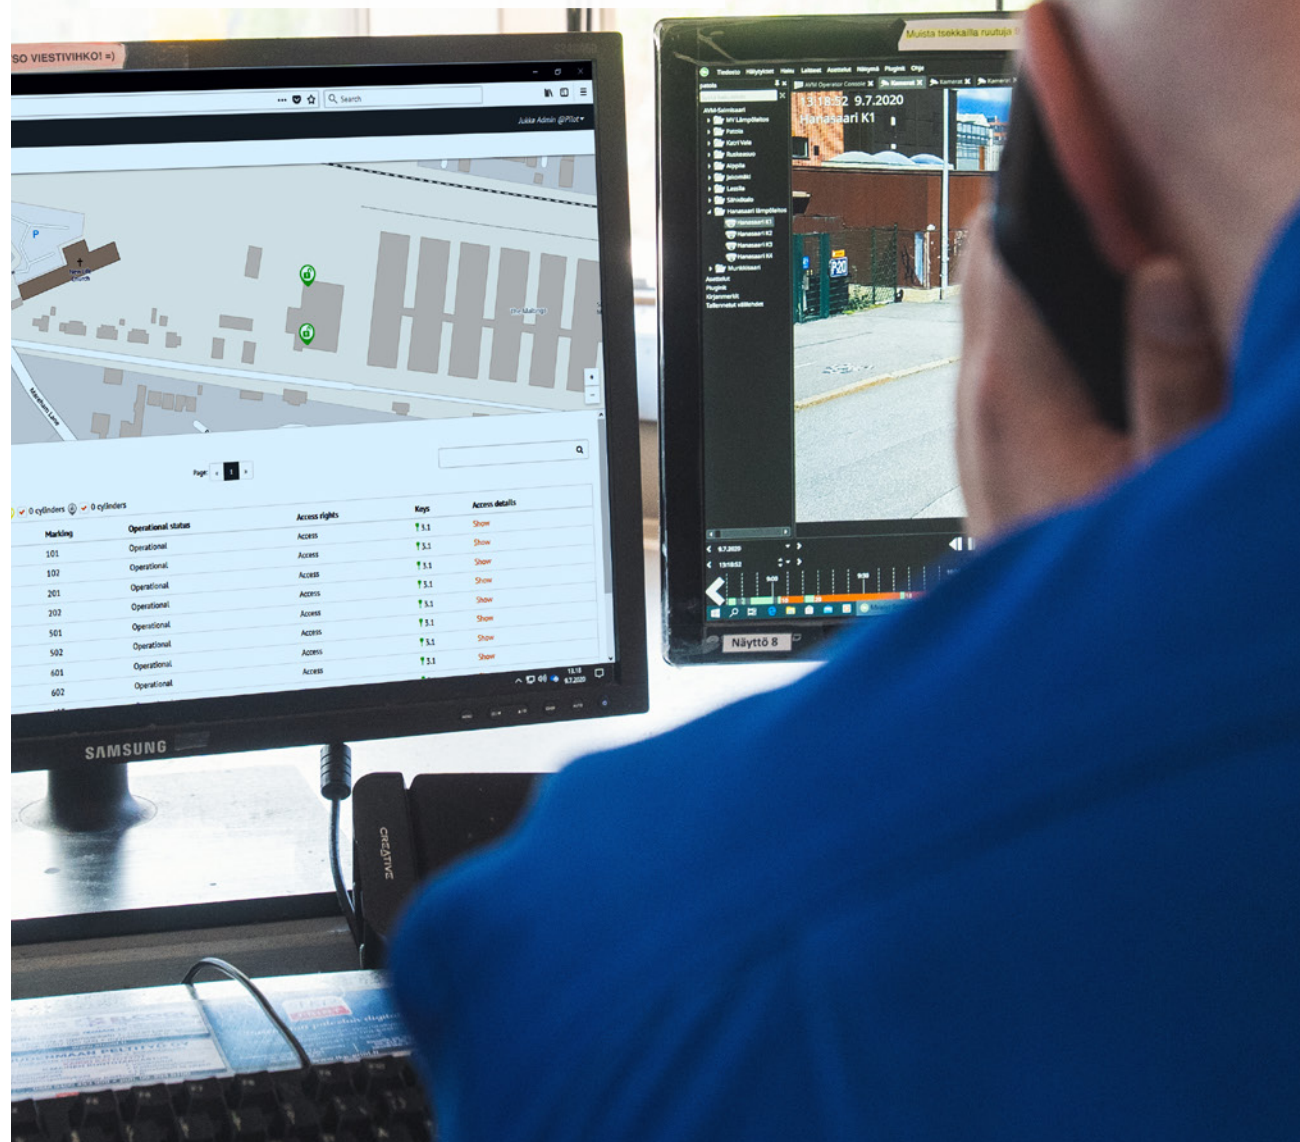

Securing the entire port infrastructure

Ports have a diverse infrastructure between private ownership, government authority, highly restricted, or require public access, such as cruise ship passenger terminals. Abloy has solutions for all areas that need to be secured, accessed and monitored.

Going beyond security in port solutions

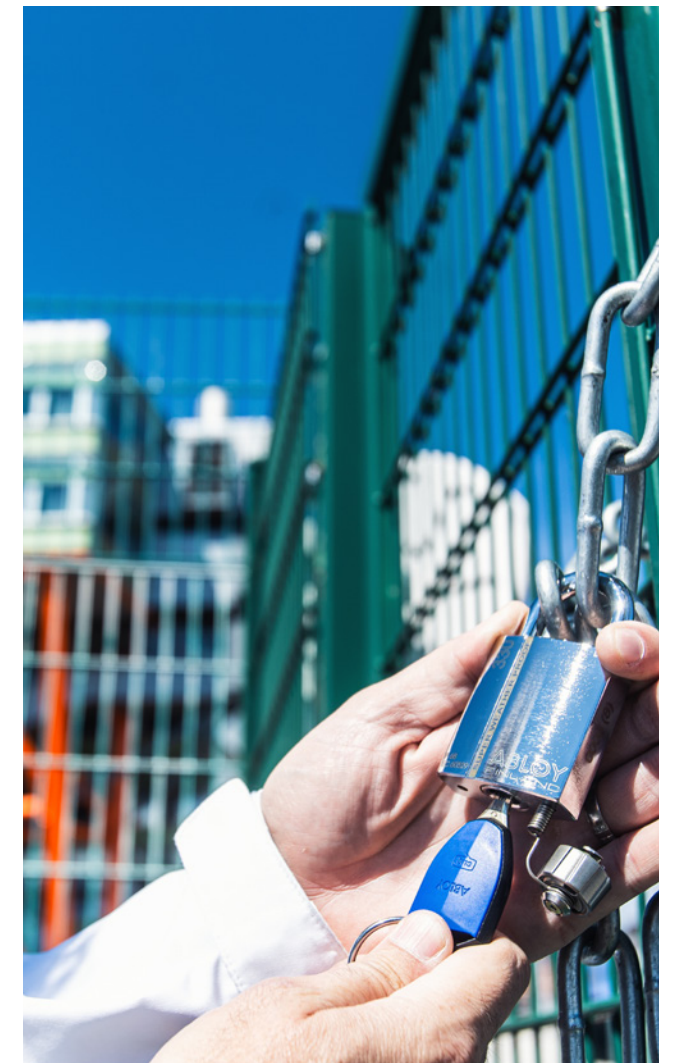

Abloy delivers a future-proof digital portfolio with keyless, electromechanical and mechanical solutions. ABLOY Digital Solutions extend the boundaries of security and access control, enabling remote access control and simplified key management, with precise audit trails. This digital convenience, efficiency and awareness saves time and increases security. The end result is operational efficiency to impact and improve all port infrastructure.

The latest Abloy technology for port safety, security and efficiency

PROTEC2 CLIQ™ and ABLOY® BEAT lead digital transformation and operational efficiency within critical infrastructure. They drive our remote lock and key control and management on-the-go, adding a new level of operational efficiency. PROTEC2 CLIQ is also well suited for port environments where mobile phone use is restricted. The pre-programmable electronic keys provide the convenience of remote control and high security throughout your business, anytime, anywhere. PROTEC2 CLIQ solutions also include IP68 and ATEX approved padlocks for guaranteed performance in any conditions. Combined with ABLOY® OS creates visual overview and situational awareness over your port security system.

For all the administration and office areas in port operations ABLOY Electric Locks provide intelligent performance under all circumstances, with premium security, precise access control and sustainability. ABLOY® EXIT products also offer a high security door environment with guaranteed exit in every situation.

ABLOY Ports solution portfolio

Our port specific solutions and products are designed to meet the highest safety and security requirements.

PROTEC² CLIQ

PROTEC2 CLIQ is Abloy's comprehensive and flexible key and access management system. It's a wirefree solution with quick and easy installation, electronic keys and an audit trail. It provides instant and precise situational awareness of movements.

Super Weather Proof Padlocks

The Super Weather Proof (SWP) Padlock range meets ATEX2 and IP68 specifications and can withstand the harshest conditions from storm-driven salt water or fine desert dust. They also come with electromechanical versions able to be linked to our CLIQ system.

ABLOY BEAT

ABLOY BEAT is a new digital locking solution that includes a Super Weather Proof Bluetooth padlock that is operated with a digital, mobile key and secured with the best-in-class Seos[®] credential technology. It's managed with ABLOY OS or can be integrated into third-party systems, so you are always in sync with your security situation.

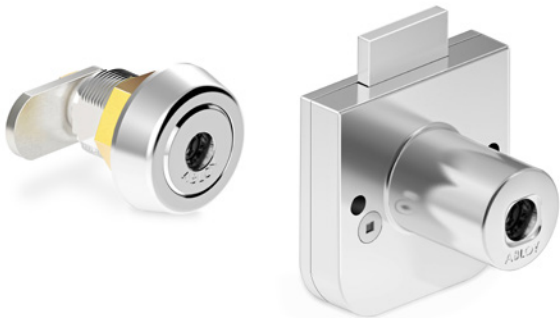

ABLOY Electric Locks

Designed for a seamless, aesthetic and smooth performance in every circumstance, the ABLOY Electric Locks are the smartest part of your access control system and are easily integrated.

ABLOY Cam Locks

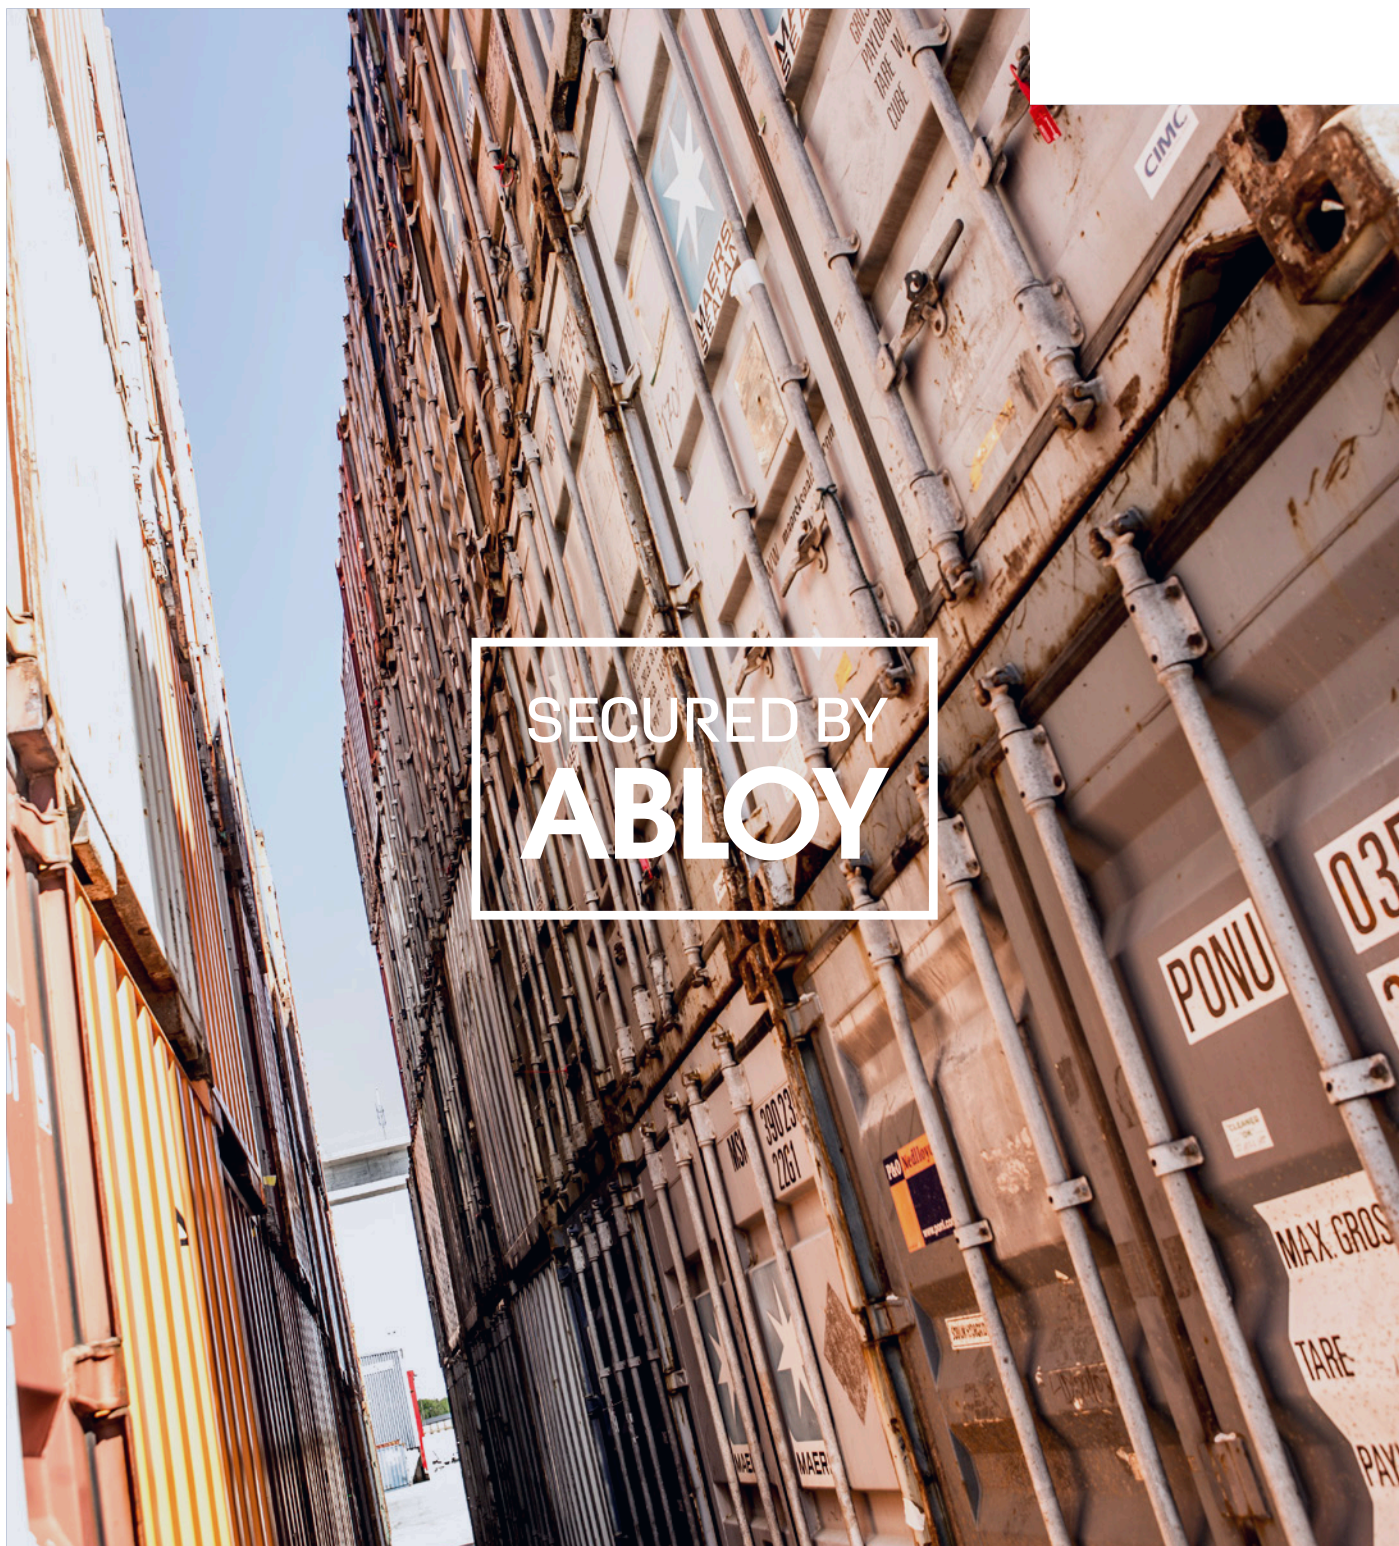

ABLOY Cam Locks are suitable for a wide range of applications including electricity cabinets, switch cabinets, distribution cabinets and other fittings.

ABLOY OS

Manage your keys, locks and user rights on the go with ABLOY OS, our user-friendly, visual interface. ABLOY BEAT, along with our other digital portfolio solutions, are managed with ABLOY OS.
