

PROTEC² CLIQ™

The ultimate in professional,
high security solutions

A person wearing a high-visibility yellow jacket with reflective silver stripes is kneeling on a paved surface next to a white car. They are working on a lock mechanism on the car's door. In the background, there is a blue metal fence with vertical bars. The scene is brightly lit, suggesting daylight.

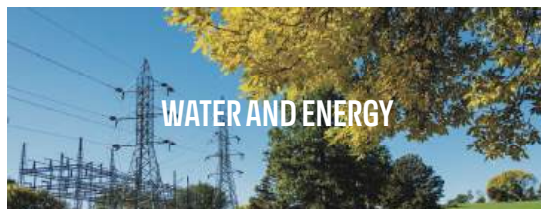

SECURE EVERY LOCK, KEY AND ACCESS ANYTIME, ANYWHERE.

PROTEC2 CLIQ answers every question that the challenges of modern global security raise. Providing instant knowledge to improve your security with a system that combines the best of Abloy's mechanical and electromechanical technology, in a digital solution. Able to manage and track all your keys, personnel access rights and movement, from a central location. The convenience of remote control and high security throughout your business, anytime and from anywhere.

FOR TRUST IN PROFESSIONAL SOLUTIONS

PROTEC2 CLIQ is designed for high level security across all commercial buildings and industrial environments including critical infrastructure such as:

WATER AND ENERGY

EDUCATIONAL INSTITUTES
AND PUBLIC PREMISES

TELECOM OPERATORS

LOGISTICS

HEALTHCARE

MANUFACTURING

FACILITY MANAGEMENT

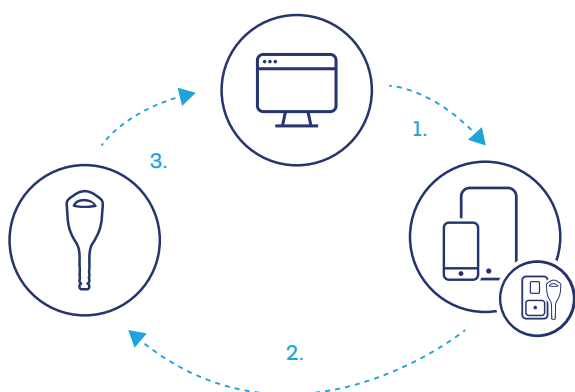

Mechanical or electronic security and access from one key

The CLIQ electronic key can open both ABLOY mechanical and CLIQ electronic locks, so there is no need to change your entire system to electronic. This is convenient if you have existing ABLOY mechanical locks that may also be in remote or outdoor places.

CLIQ Web Manager Web Manager for improved efficiency

A convenient control centre for all your keys and access rights

The browser based CLIQ Web Manager adds remote control capability and transparency of all your key movement and access rights management. Available as a Software as a Service option (SaaS). A convenient option with all updates, support and service levels assured with Service Level Agreements.

How it works

1. The user updates the changes the administrator has made using the CLIQ Connect app or through a wall or mobile programming device.
2. After updating the access rights, the user only has access to the validated area during the specified time.
3. At the same time the updates are made, the access information is transferred to the system.

CLIQ™ Connect

Wireless key updates from anywhere, anytime

CLIQ CONNECT adds the convenience of a smartphone solution with access rights updatable wirelessly, anywhere at any time via a mobile app and Bluetooth CLIQ Connect key.

They can also be updated on site via a wall PD or separate mobile PD. There is also a new PIN validation feature configured with the CLIQ Web manager for the CLIQ Connect app. It's available for mobile workforces and maintenance crews yet still retaining high level security – even in areas with no network connection.

Smartphones with a built-in fingerprint reader can also be used once compatibility has been confirmed with your ABLOY representative. CLIQ Connect also works with both iOS and Android systems.

ABLOY OS

Scalable and 3rd party integrable operating system

ABLOY OS helps you manage your businesses daily security, access rights and control, quickly and conveniently.

It provides:

- A visual situational overview
- Easy access management
- Extended reporting with full audit trails

You can manage your keys, locks, and access rights on-the-go and remotely from a single interface.

Available only in selected countries.

THE WIDEST RANGE OF DURABLE DOOR CYLINDERS, LOCKS AND PADLOCKS

PROTEC2 CLIQ works with all ABLOY's door cylinders, locks and padlocks. They are proven and tested in the harshest conditions, keeping dust, extreme weather and any unauthorised intruders out.

WIRE-FREE AND EASY TO INTEGRATE

With pre-programmed and wire-free components PROTEC2 CLIQ greatly reduces installation cost with new locks and locations easily able to be added. The web services interface also supports convenient integration with your existing systems.

AWARD WINNING GLOBALLY ACCLAIMED TECHNOLOGY

PROTEC2 CLIQ and CLIQ Connect have won numerous international security and access control awards since 2011.

THE OPERATIONAL EXCELLENCE OF PROTEC2 CLIQ

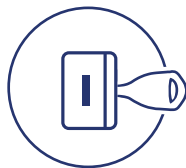

One key logistics – no more travel to central locations for key hand out / hand in.

Reduced risk of lost keys – lost keys can simply have their rights deleted.

Reduced aborted site visits – no more jammed locks or wrong key issues.

Wire-free Wall PD installation – wire-free, Bluetooth PD's save time and installation costs.

Complete audit trail – tracks the exact key access time of subcontractors on site.

Reduced downtime – quick site access in case of an incident.

Investing in the future – easy to add new keys and locks and to upgrade the system.

Quick deployment and use – the keys are instantly programmable with the web manager, wire-free PD's and CLIQ Connect mobile solution.

Integrable and encrypted system – integrable with other systems through the Web Services interface with highly encrypted data transfer.

Increased safety – only the registered key holders can access restricted areas at the given time.

SECURED BY
ABLOY

Abloy is a security and locking innovation company with trust at the core of all activities. By combining mechanical and digital expertise Abloy develops industry leading security solutions to protect people, property and business. Abloy is part of the ASSA ABLOY Group.
