

# Retail Banks, ATMs and CIT

## One Key, Many Solutions

## Key Control and Reducing Risk

- Key Audit
  - How many keys do you have in circulation, do you know who has keys, and how many times have keys been copied?
  - Do you have a problem with lost or stolen keys?
- Are you at risk from internal theft?
- Would you like to reduce missed engineer calls, manage multiple sites with one permission controlled key, which has a dual-control facility if required?
- Would you benefit from managing Branch and ATM Networks with one key that also has route planning integration?

## ABLOY Solutions

The CLIQ® system from ABLOY is an easy-to-use web managed electro-mechanical key system. CLIQ® provides permission controlled key management, comprehensive audit trails on locks and padlocks, and the capability to remove lost or stolen keys from the system quickly and easily.

## Benefits of CLIQ®

- One key opens multiple locks.
- Customisable permission controlled locking solution – remote web management updates, anytime, anywhere.
- Eliminates the risk from lost or stolen keys.
- Full audit trail – who, where and when.
- Improves operational efficiency, eliminating missed engineer calls.
- Single key management of Branch and ATM networks.
- Integrates with route planning, improving CIT operational efficiency and eliminating wasted journeys.

## Proven solutions for your high security needs

Security begins with the protection of your people, assets and property.

With the physical changes that have taken place in retail banking, including expanding distribution of ATMs and the coverage of CIT services, the pressure to maximise control of security and improve operational efficiencies has never been greater.

Our mission is to meet these challenges with complete locking solutions for the 21st century.

ABLOY products are recognised and trusted as the premium high security locking solutions, chosen around the world to protect critical infrastructure.

For over 110 years ABLOY has developed expertise and innovated so we can design a system that is right for virtually any environment, and we have achieved the highest industry accreditations, standards and stringent physical attack tests.

To request a risk assessment contact our Head of CNI, Steve Wintle,
