

# ABLOY® OS INCEDO

Enhanced digital security and access management for professionals

As part of our Security and Access Solutions Portfolio, OS INCEDO, provides an enhanced solution for complete access management, connectivity, security and convenience, from wherever you are.

## Digitally connecting your entire operation

OS INCEDO adds operational efficiency by connecting all mechanical, electromechanical and digital solutions into one cloud-based application. This includes PROTEC<sup>2</sup> CLIQ, mobile access solutions and a wide range of mechanical key management features.

**MECHANICAL  
KEY MANAGEMENT**

**PROTEC<sup>2</sup> CLIQ**

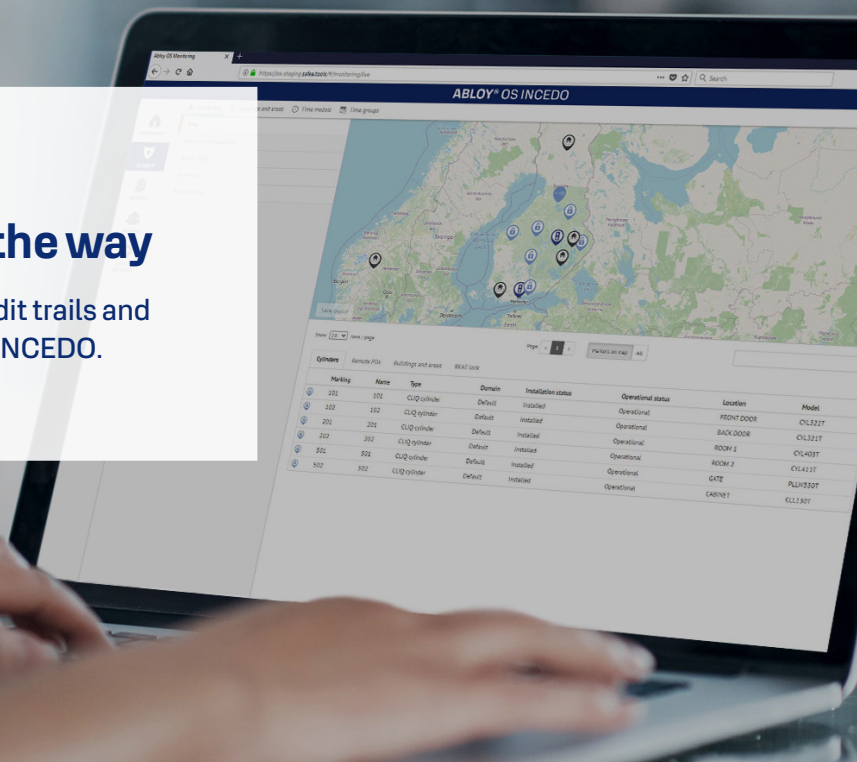

**MOBILE ACCESS**

# ABLOY

## A visual map-based interface that leads the way

User-friendly map interfaces, audit trails and in-depth reports are the core OS INCEDO.

Visual map-based interface

Area-based access control

Role-based permissions

Extended reporting

Audit trail of every key

More visibility and situational awareness

### One vision for entire Professional End User (PEU) operations

In high level security and restricted environments OS INCEDO provides the convenience of digital cloud connectivity across all professional end user application areas. To increase on-the-go key management and situational awareness, OS INCEDO is used in the following PEU operations:

- **Banking / ATM**
- **ICT / Datacentres**
- **Healthcare/Medicals**
- **Vending**
- **Museums**
- **Military**
- **Government /Municipalities**
- **Postal Services**
- **Casinos**
- **Manufacturing critical assets**

### Available as SaaS

Abloy is 'For Trust' even in our global service and support. From setting up your environment to ensuring professional support and services for continuous operation, all your needs are taken care of. OS INCEDO available 24/7 anywhere, as a convenient SaaS solution.
