FOR TRUST IN CORRECTIONAL FACILITIES

# Security and Access Solutions for Correctional Facilities

**ABLOY**

# For Trust in Correctional Facilities

ABLOY digital, electronic and mechanical future-proof solutions provide a high level of security, control and efficiency for all aspects of correctional facilities from cells to outer gates.

## Providing controlled access with flexible use

In correctional facilities, it is vital that every movement on the premises is controlled carefully, so only the intended people get in and out. While restricting the movement of inmates, the correctional facility staff and third parties must be able to do their work and access all the doors needed as easily and flexibly as possible.

With ABLOY Electric Locks and PROTEC<sup>2</sup> CLIQ key and access management system, access rights can be defined based on time, needs and work tasks. At the same time, the audit trail on what key opened the door and when is stored in the devices. Together with mechanical and electronic solutions, along with ABLOY CUMULUS platform for keyless access in service ports, we provide a comprehensive solution to secure and manage every locking point in correctional facility operations.

## Improved hygiene safety and healthier environment

In correctional facilities, diseases can spread easily due to a confined and crowded space. Hygiene safety is important for the safety of staff and inmates, as well as for operational efficiency and reducing sick leaves. To keep the premises cleaner and the users healthier, the antimicrobial ABLOY ACTIVE solution, specifically designed for door fittings, destroys bacterial pathogens efficiently thanks to the silver it contains. The ACTIVE solution destroys up to 99% of harmful bacteria combined with regular cleaning.

## Reliable security solution

Vandalism and indiscipline are common threats in correctional facilities. To ensure security, safety and maintaining undisturbed service, the locking products must be reliable in any situation. ABLOY products made in Finland are known for their top-class security and durability, both in mechanical and electronic solutions. Reliable ABLOY products improve safety and control not only in everyday life, but also in emergencies and exit situations. With Abloy's solutions, the correctional facility work environment can be significantly improved, making it more efficient, flexible and safer for the staff.

## Securing correctional facility operations and the society as a whole

Compared to correctional facilities years ago, when conditions were more restricted, the aim today is to reintegrate inmates into society with more humane means. Step by step, the correctional facility operations and systems are becoming smarter, and inmates may have different technology or even keys to use. At the same time, the correctional facility population is increasing globally as laws and penalties get stricter. In addition, drug use and gang culture in correctional facilities have increased in some regions. Correctional facility security is crucial to maintaining not only staff, visitor, and inmate safety, but the society as a whole.

At Abloy, we protect your premises, assets and personnel by overcoming all the main challenges with one comprehensive solution. With remote access management, simplified key management and audit trails you save both time and expenses without compromising the level of security and control. 115 years of experience in the industry and operations globally in 90 countries ensure that our support and services are close and available. As a trusted advisor, we understand the clients' needs and operations, developing solutions and services that enhance and secure your business.

# Comprehensive product range for correctional facility security

Our product portfolio offers a comprehensive range of high quality solutions to secure the entire correctional facility area from the main gate to the cell ward.

## ABLOY® ELECTRIC LOCKS

Designed for a seamless and smooth performance, the ABLOY Electric Locks bring extra intelligence to your door security. They are suitable for high security environments and easily integrated into access control systems. Energy efficiency is also a functional benefit, because power is typically consumed only when the lock is in use.

## ABLOY® DOOR CLOSERS

ABLOY door closers are an important part of an access control system and they protect door constructions by controlling the opening and closing actions of the door. Energy will be saved and security increased.

## ABLOY® ACTIVE

Surfaces in doors are a convenient place for harmful microbes to spread through physical contact. The ABLOY ACTIVE solution destroys up to 99% of harmful bacteria combined with regular cleaning thanks to the antimicrobial properties of silver. ACTIVE is a standard feature on all painted, polished and brushed brass handles.

## CUSTOM SOLUTIONS

For decades, Abloy has been developing customised applications for Original Equipment Manufacturers (OEM) and Professional End Users (PEU). Whether it's a new configuration of existing components or a completely new structure for an existing system, our goal is always a cost-effective, holistic solution with a competitive advantage.

## PROTEC<sup>2</sup> CLIQ™

PROTEC<sup>2</sup> CLIQ is Abloy's comprehensive and flexible key and access management system. It's a wireless solution with easy installation, electromechanical keys and an audit trail. It provides situational awareness to a central location. It's scalable for future needs and can be integrated with other systems.

## ABLOY® CUMULUS

ABLOY CUMULUS provides the key to keyless access by bringing all the solutions together into a single ecosystem with an integrated cloud service. The CUMULUS range of keyless and online access solutions – from mobile keys and padlocks to other upcoming products – can be administered with the software tool that best suits the customers' needs.

# SECURED BY ABLOY

ABLOY offers security and locking innovations dedicated to creating more trust in the world. Abloy maintains Product Security Center at [www.abloy.com/securitycenter](http://www.abloy.com/securitycenter). We recommend that You check the Center on a regular basis in order to be fully informed of product security updates, so that your knowledge of our products remains optimal.

It is the customer's responsibility to define the required level of security, whilst taking into consideration relevant factors for its operations. To achieve the overall level of security required in the customer's operations multiple layers of security must be in place. These include for example locking system, key management system, access management, CCTTV and alarm system as well as physical security in a manner and level specified by the customer.
