FOR TRUST IN DEFENCE FORCES

Security and Access Solutions for Defence Forces

ABLOY

For Trust in Defence Forces

ABLOY digital, electronic and mechanical future-proof solutions provide a high level of security, control and efficiency for all aspects of defence forces from outer gates to armoury and rehearsal area.

Providing controlled and consistent access with flexible use

The operations of defence forces are often geographically widespread, and different facilities and locking points can be located significantly far away from each other. At the same time, consistency and accuracy in terms of safety and access must be maintained everywhere. In addition to strictly limited and controlled access rights, personnel must be able to move easily and flexibly between different locations if necessary.

With ABLOY solutions, access rights can be defined strictly based on time, needs and work tasks – with even just one key, that opens all the doors needed at each location. At the same time, the comprehensive audit trail on who opened the door and when is stored in the access register. Together with mechanical, electronic and keyless solutions we provide a comprehensive solution to secure and manage every locking point in defence forces operations.

Improved hygiene safety and healthier environment

In defence forces, diseases can spread easily due to a confined and crowded space. Hygiene safety is important for the safety of military, as well as for operational efficiency and reducing sick leaves. To keep the premises cleaner and the users healthier, the antimicrobial ABLOY ACTIVE solution, specifically designed for door fittings, destroys bacterial pathogens efficiently thanks to the silver it contains. The ACTIVE solution destroys at best 99% of harmful bacteria combined with regular cleaning.

Securing defence forces – now and in the future

Defence forces are the cornerstone of security in society. Under normal circumstances they remain mostly unnoticeable, but when the situation changes, we rely on their operations. At the same time, the operation and training must keep on running without interruption, both in normal everyday life and in emergency situations. Today, defence forces face new challenges and needs. Geopolitical changes, cyber threats, and conflicts require raising the security level. At the same time, access must be as smooth and fast as possible. Defence forces security is crucial to maintaining not only military safety, but the society as a whole.

At Abloy, we protect your premises, assets and personnel by overcoming all the main challenges with one comprehensive solution. With remote access control, simplified key management and precise audit trails you save both time and expenses without compromising the high level of security and control. Over 115 years of experience in the industry and operations globally in 90 countries ensure that our support and services are always close and available. As a trusted advisor, we understand the security needs of defence forces, constantly developing solutions and services that enhance and secure your operations.

Reliable solution designed for harsh conditions

At Abloy we offer:

-  Top-class security solutions for demanding environments
-  Reliable high-quality products made in Finland

-  Safety and control in everyday life as well as in emergencies
-  Efficient access for more flexible work environment

Base of Operations

Access Groups

- Maintenance
- Basic
- Restricted
- High-security

ABLOY products

- Padlock mechanical
- Padlock CLIQ/CUMULUS
- Cylinder mechanical
- Cylinder CLIQ
- Cabinet Lock CLIQ
- Cam Lock CLIQ
- Electric lock
- Door closers
- Custom made product

Comprehensive product range for defence forces security

Our product portfolio offers a comprehensive range of high-quality solutions to secure the entire defence forces operation from main gates to living spaces.

ABLOY® ELECTRIC LOCKS

Designed for a seamless and smooth performance, the ABLOY Electric Locks bring extra intelligence to your door security. They are suitable for high security environments and easily integrated into access control systems. Energy efficiency is also a functional benefit, because power is typically consumed only when the lock is in use.

MECHANICAL SOLUTIONS

Wide range of mechanical ABLOY solutions from padlocks to lock cases, cylinders and industrial locks provide high-security for different needs and environments.

PROTEC² CLIQ™

PROTEC² CLIQ is Abloy's comprehensive and flexible key and access management system. It's a wireless solution with easy installation, electromechanical keys and an audit trail. It provides situational awareness to a central location. It's also scalable for future needs and can be integrated with other systems.

ABLOY® ACTIVE

Surfaces in doors are a convenient place for harmful microbes to spread through physical contact. The ABLOY ACTIVE solution destroys at best 99.9 % of harmful bacteria combined with regular cleaning thanks to the antimicrobial properties of silver. ACTIVE is a standard feature on all painted, polished and brushed brass handles.

ABLOY® SUPER WEATHER PROOF PADLOCKS (SWP)

The Super Weather Proof (SWP) Padlocks are designed to withstand harsh conditions, from storm-driven salt water to fine desert dust. Security is enhanced, even when your gates and ports are regularly exposed to extreme heat or cold. Also available in IP68 approved electromechanical versions that can be linked to our CLIQ system.

ABLOY® CUMULUS

ABLOY CUMULUS provides the key to keyless access by bringing all the solutions together into a single ecosystem with an integrated cloud service. The CUMULUS range of keyless and online access solutions – including mobile keys, padlocks, a controller and other upcoming products – can be administered with the software tool that best suits the customers' needs.

SECURED BY ABLOY

ABLOY offers security and locking innovations dedicated to creating more trust in the world. Combining digital and mechanical expertise, Abloy Oy develops industry-leading security solutions that protect people, property and business. Abloy is part of the ASSA ABLOY Group, the global leader in access solutions. Every day, we help billions of people experience a more open world.

Abloy maintains Product Security Center at www.abloy.com/securitycenter. We recommend that You check the Center on a regular basis in order to be fully informed of product security updates, so that your knowledge of our products remains optimal.

It is the customer's responsibility to define the required level of security, whilst taking into consideration relevant factors for its operations. To achieve the overall level of security required in the customer's operations multiple layers of security must be in place. These include for example locking system, key management system, access management, CCTV and alarm system as well as physical security in a manner and level specified by the customer.
