FOR TRUST IN FINANCE

Security and Access Solutions for the Finance Industry

BANK

ABLOY

Securing and enhancing finance operations

The finance industry is going through a massive digital transformation. Digital transactions are essentially becoming the norm as hybrid working is increasing, people pay via mobile applications, and connect with others online.

Big drivers behind the transformation are efficiency and trust. At the same time the finance sector faces multiple challenges. Unauthorised access to facilities can risk the safety of both cash and data handling and cause reputational damage.

Securing geographically distributed facilities needs high-class solutions and access management. Employees, contractors, and visitors must all have access to areas they need – and be kept away from areas that don't concern them.

Keeping data and cash more secure from cyber threats and physical threats

As digital transactions increase, solutions must be expanded from securing physical cash to keeping all critical finance data more secure from threats. Securing all possible data access points from ATMs to trading venues demands security solutions that deliver a high level of protection against cyber threats and physical threats.

Simplifying processes and increasing operational efficiency

With branched out offices, cash transits and ATMs, staff and cash are always on the move. High-quality ABLOY solutions can increase operational efficiency as access rights can be granted remotely. This way less time and fuel are spent unnecessarily on transits and picking up the right keys.

Securing the finance industry for more than 50 years

Our first electric lock was developed to secure the Bank of Finland's printing works in 1978. Now expandable locking systems can be designed to cover large and extensive facilities and our access management solutions simplify and streamline your operations.

Improve operational efficiency with tried-and-tested ABLOY solutions

Minimise time spent on key and access management

Decrease information misuse to reduce internal threats

Data can be used to improve business intelligence and to further develop solutions

Activity with locks can be traced with the built-in and automated audit trails

Tighter security and greater overall situational awareness

Operational efficiency can increase with right combination of products

Access rights can be customised individually and activated for set time periods

Integration with existing physical and digital solutions and third-party solutions

CASE EXAMPLE:

Bank

Access Groups

- Public
- Staff only
- Meeting rooms
- High-security areas

ABLOY products

- Electric lock
- Cam Lock mechanical
- Cam Lock CLIQ
- Cylinder CLIQ
- Cabinet Lock mechanical
- CUMULUS product
- Custom made product

A wide range of choices and integrations

Integration with third-party security and access management systems is essential to ensure that all security systems can communicate with each other. This creates tighter security and greater overall situational awareness – a main feature of ABLOY solutions.

ABLOY® ELECTRIC LOCKS

Designed for a seamless, aesthetic, and smooth performance in every circumstance, the ABLOY Electric Locks are the smartest part of your access control system and are easily integrated.

ABLOY® CUMULUS

ABLOY CUMULUS is a cloud service for modern security management. It combines quality products with secure access and management applications. It provides the key to keyless access by bringing all the solutions together into a single ecosystem with integrated cloud service.

PROTEC² CLIQ[®]

PROTEC² CLIQ combines the best of Abloy's patented mechanical detainer disc and electromechanical technology, in a digital solution. Able to manage all your keys and personnel access rights from a central location. The convenience of remote management and high-level security throughout your business anytime and from anywhere.

MECHANICAL SOLUTIONS

Wide range of mechanical ABLOY solutions from padlocks to lock cases, cylinders and industrial locks provide high-security for different needs and environments.

ABLOY[®] CUSTOM PRODUCTS

For decades, Abloy has been developing a range of customised applications for original equipment manufacturers and professional end users. Working closely with our customers allows us to develop customised solutions at many different levels. Whether it's a new configuration of existing components or a completely new structure for an existing system, our goal is always a cost-effective holistic solution, offering a significant competitive advantage.

8805007 | 11/2024

ABLOY offers security and locking innovations dedicated to creating more trust in the world. Combining digital and mechanical expertise, Abloy Oy develops industry-leading security solutions that protect people, property and business. Abloy is part of the ASSA ABLOY Group, the global leader in access solutions. Every day, we help billions of people experience a more open world.

Abloy maintains Product Security Center at www.abloy.com/securitycenter. We recommend that You check the Center on a regular basis in order to be fully informed of product security updates, so that your knowledge of our products remains optimal.

It is the customer's responsibility to define the required level of security, whilst taking into consideration relevant factors for its operations. To achieve the overall level of security required in the customer's operations multiple layers of security must be in place. These include for example locking system, key management system, access management, CCTV and alarm system as well as physical security in a manner and level specified by the customer.
