# **Security and Access Solutions for Healthcare**

**ABLOY**

# Streamlining security and access in day-to-day healthcare

**Universal changes in working life and business are also affecting the healthcare sector. Automation, telemedicine and virtual interfaces are becoming a norm. Healthcare professionals need easy access to secured data. Sustainable practise is required. Employees may want purpose and meaning at work, but they are busier than ever.**

If security and access, as well as daily activities, are cumbersome and time-consuming, the staff will take shortcuts in difficult matters. Especially in under-resourced situations, the well-being of the staff is at stake and risks, including patient safety, increase.

That is why, amid constant change, security needs to be easy and embedded in daily routines. Emergencies must be prepared for, and operational efficiency and continuity must be maintained. To facilitate day-to-day healthcare, Abloy's trusted advisors help in finding the best solutions for our client's safety and security needs.

ABLOY products streamline daily procedures, and our advisors assist with security needs ranging from personnel and patient safety to information security.

## More time to care

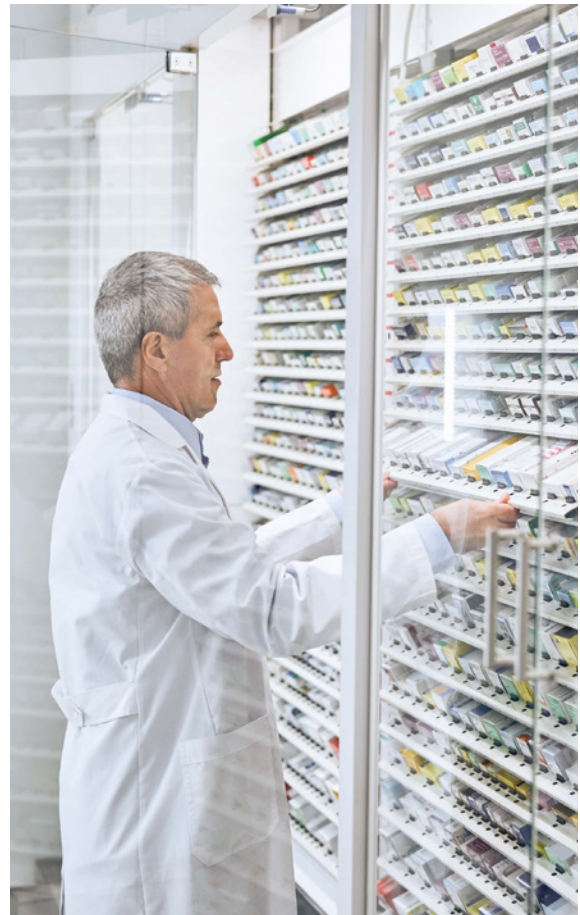

Hospitals face a wide range of security challenges. In large healthcare facilities people need to be taken care of around the clock, and as a result, staff work in multiple shifts. When facilities and staff are large, poorly administered access management can cause problems. However, with tried-and-tested ABLOY solutions, this challenge can be addressed.

With advanced key and access management system, medical staff can access multiple locking points with

a single electromechanical or mobile key, reducing the time used looking for the right key.

With adjustable access rights, each member of the staff can carry their own personal key with personalized access rights. This improves drug stock control, security, hygienic safety, accountability and gives staff more time to focus on care. If a key gets lost, key can't be revalidated which reduces security risk without rekeying.

Many healthcare facilities have areas where access control is particularly stringent, such as surgical or psychiatric wards and medicine cabinets.

## Integrability with other systems

Facility, security, human resource and other management systems are integrating. Properties are becoming keyless and access rights are increasingly digital.

Easy integration of access management systems with various third-party systems is crucial to maintain existing workflows and processes. That is why ABLOY solutions and products can be integrated to existing operational business applications, including third-party solutions. This creates tighter security, greater overall situational awareness and operational efficiency – a main feature of ABLOY solutions.

## Reducing harmful microbes

Microbes accumulate particularly in hospitals and are spread from one surface to another. Bacterial transmission through contact can be minimised with touch-free door openings.

Reducing the number of infections will lead to better patient safety and less absences among staff due to illness.

Infection-reducing antimicrobial ABLOY ACTIVE solutions in door environments can **destroy up to 99 percent of harmful bacteria**, including the MRSA hospital bacteria, Listeria and Salmonella, while being 100 percent safe for the user.

## Decades of expertise in advanced healthcare solutions

Abloy has a long history in innovating and providing security and access solutions for the healthcare sector. We have accumulated comprehensive know-how and expertise over decades in our home market of Finland, that has one of the world's most respected and advanced public healthcare systems. Our experts will personally help you find the best solution for your needs, making the project easy for you.

# Easily improve healthcare efficiency and safety with trusted advisors of ABLOY

**Hassle-free access management saves vital time when there is a lot of shift work and staff turnover is high**

**External subcontractors can be granted access securely and reliably**

**The risk of lost keys and misuse is reduced**

**Touch-free door opening minimises bacterial transmission through contact**

**Employees only need one key to open all the necessary locks, no key exchange required, further reducing risk of infection**

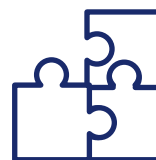

**Antimicrobial coatings destroy harmful bacteria**

**The institution's reputation as a safe workplace improves, staff are more satisfied and available, care and medical errors less common**

**Digital, mechanical, and keyless in one comprehensive solution**

**Integration with third-party solutions already in use reduces the need for multiple overlapping interfaces**

## A wide and tested range of choices

Our range of solutions for healthcare security and access cover all entry and access points including doors, locks, cabinets and exits. The extensive global distribution network, with local support, ensures customer centric service and assistance from the trusted advisors of ABLOY.

### PROTEC² CLIQ®

PROTEC² CLIQ combines the best of Abloy's patented mechanical detainer disc and electromechanical technology, in a digital solution. Able to manage all your keys and personnel access rights from a central location. The convenience of remote management and high-level security throughout your business anytime and from anywhere.

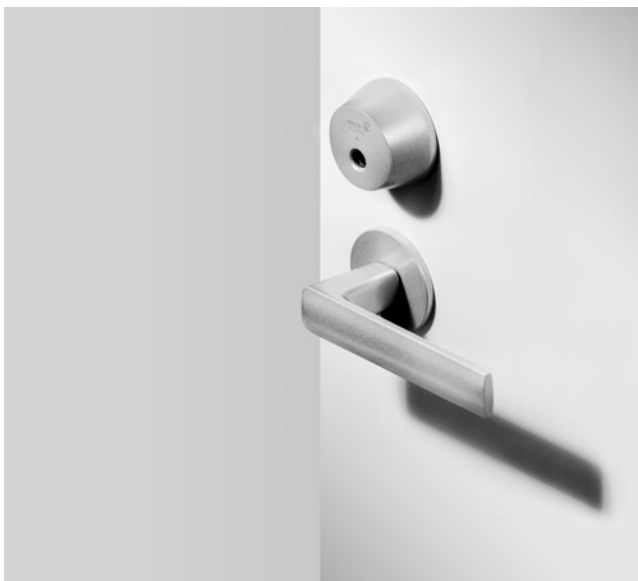

### ABLOY® ELECTRIC LOCKS

Designed for a seamless, aesthetic and smooth performance in every circumstance, ABLOY Electric Locks are the smartest part of your access control system and are easily integrated.

### ABLOY® CUMULUS

ABLOY CUMULUS is a cloud service for modern security management, combining quality products with secure access and management applications. It offers a digital access management solution that enables smooth entry to locations using a mobile device.

## Antimicrobial coating for door environments

Door surfaces are a convenient place for harmful microbes to spread through physical contact. Specifically designed for door accessories and fittings, our unique ABLOY ACTIVE coating destroys bacteria efficiently thanks to the antimicrobial properties of silver.

## ABLOY® EXIT

ABLOY EXIT is a simple, reliable and comprehensive solution for safe exit. By preparing and investing in functional exit safety today, you can improve exit safety in emergency situations.

## ABLOY® CUSTOM PRODUCTS

For decades, Abloy has been developing a range of customised applications for original equipment manufacturers and professional end users.

Working closely with our customers allows us to develop customised solutions at many different levels. Whether it's a new configuration of existing components or a completely new structure for an existing system, our goal is always a cost-effective holistic solution, offering a significant competitive advantage.
